RETAIL ELECTRICITY PRICES FOR NON-MARKET CUSTOMERS

Electricity Act 1994

Pursuant to my authority under sections 90 and 320 of the *Electricity Act 1994* ('the Electricity Act')¹, I hereby decide that, on and from 1 July 2007, the notified prices that a retail entity must charge its non-market customers, subject to the provisions of sections 55, 90, 91 and 91A of the Electricity Act, are the applicable prices set out in the attached Tariff Schedule or, as the case may be, the prices obtained by applying the applicable methodology or process set out in the attached Tariff Schedule.

This Tariff Schedule (other than Part 5) does not apply to non-market customers supplied under Country Energy's Special Approval No. SA21/98 (being non-market customers connected to Country Energy's New South Wales network which extends into southern Queensland). Under the terms of the Special Approval, these non-market customers will generally pay no more for electricity than other Queensland non-market customers of a similar usage category or class.

As required by section 90(8) of the Electricity Act, I state that the notified prices are exclusive of the goods and services tax ('GST') payable under the *A New Tax System (Goods and Services Tax) Act 1999* (Cth) ('the GST Act').

In addition to the applicable tariff, a retail entity may charge a non-market customer an additional amount in accordance with a program or scheme for the purchase of electricity from renewable or environmentally-friendly sources (whether or not that additional amount is calculated on the basis of the customer's electricity consumption), but only if –

- (a) the customer voluntarily participates in such program or scheme;
- (b) the retail entity has obtained the customer's explicit informed consent (as defined in the Electricity Industry Code) to charge the customer an additional amount (and whether such amount is inclusive or exclusive of GST), provided that if a customer is participating in such a program or scheme at 30 June 2007 the customer is taken to have provided explicit informed consent for the retail entity to charge the customer the additional amount payable under the program or scheme; and
- (c) the retail entity gives the customer prior written notice of any change to the additional amount payable under the program or scheme.

Dated this 19th day of June 2007.

GEOFF WILSON MP
Minister for Mines and Energy

¹ In accordance with section 320(2) of the Electricity Act, all references to the Electricity Act in this decision are references to the Electricity Act as amended by the *Electricity and Other Legislation Amendment Act 2006*, whether or not those amendments have commenced on the date of this decision.

TARIFF SCHEDULE

Note 1: For the purposes of ss. 55, 90, 91 and 91A of the Electricity Act, the tariffs and other retail fees and charges in this Tariff Schedule are exclusive of GST payable under the GST Act.

Note 2: This Tariff Schedule is structured in several Parts:

Parts 1 to 4 (inclusive) apply to non-market customers;

Part 5 applies to eligible non-market and eligible market customers; however, application to eligible market customers occurs by virtue of the Electricity Rebate Agreement with the Department of Communities under which retail entities agree to apply Part 5 of the notified prices;

Part 6 applies to eligible non-market customers of Ergon Energy Queensland Pty Ltd. Eligible non-market customers of other retail entities may apply directly to the Department of Mines and Energy for relief from electricity charges if a drought declaration is in force – see Part 6 for more detail.

Note 3: To ensure the correct application of the tariffs set out in this Tariff Schedule, the retail entity and the customer must have regard to Part 3 (Application of Tariffs for Customers on Notified Prices – General).

Note 4: Any reference in this Tariff Schedule to a time is a reference to Eastern Standard Time.

- builders' temporary installations that were taking unmetered supply at 30 June 2007 may remain unmetered until 31 December 2007.

From 1 January 2008, electricity supply to all builders' temporary installations will be required to be metered.

For unmetered electricity supply to a builder's temporary installation, the customer shall be charged the minimum payment per month under Tariff 21 for each month that electricity is supplied (pro-rated for supply for a part of a month).

Such supply is to be charged at general supply rates under Tariff 20, 21 or 22, as agreed between the customer and the retail entity, based on consumption determined by the distribution entity using the wattage and hours of operation agreed between the customer and the distribution entity.

Charges for installation, maintenance and removal of supply to an unmetered installation may apply in addition to the above charge for electricity supplied.

Part 3**APPLICATION OF TARIFFS FOR CUSTOMERS ON NOTIFIED PRICES – GENERAL**

Non-market customers may choose to be charged on any of the tariffs that the retail entity agrees are applicable to the customer's installation and provided that appropriate metering is in place.

If there has been a material change of use at the customer's premises, such that the tariff on which the customer is being charged is no longer applicable, the retail entity may require the customer to transfer to a tariff applicable to the changed use.

If a change to the customer's meter is required to support the applicability of a tariff to a customer, the customer may request the retail entity to arrange for the required meter to be installed at the customer's cost.

Customers have the option, on application in writing or another form acceptable to the retail entity, of changing to any other tariff that the retail entity agrees is applicable to the customer's installation. Customers shall not be entitled to a further option of changing to another tariff until a period of twelve months has elapsed from a previous exercise of option. However, a retail entity at the request of a customer may permit a change to another tariff within a period of twelve months if –

- (i) a tariff that was not previously in force is offered and such tariff is applicable to the customer's installation; or
- (ii) the customer meets certain costs associated with changing to another tariff.

Customers previously supplied under tariffs which have now been discontinued or redesignated (whether by number, letter or name) will be supplied under other tariffs appropriate to their installations.

All accounts for electricity supplied which are for an amount which is not a whole number multiple of five cents, shall be reduced to the next closest amount which is a whole number multiple of five cents.

Supply Voltage**(a) Low Voltage**

Except where otherwise stated, the tariffs in Part 1 will apply to supply taken at low voltage (480/240 volts or 415/240 volts, 50 Hertz A.C., as required by the distribution entity).

(b) High Voltage**(i) Customer plant requirements.**

By agreement between the customer and the distribution entity, supply may be given and metered at a standard high voltage, the level of which shall be prescribed by the distribution entity. Where high voltage supply is given, a customer shall supply and maintain all equipment including transformers and high voltage automatic circuit breakers but excepting meters and control apparatus beyond the customer's terminals.

(ii) Credits where L.V. tariff is metered at H.V.

Where supply is given in accordance with (i) above and metered at high voltage then, except in cases where high voltage tariffs are determined or provided by agreement to meet special circumstances, the tariffs applied will be those pertaining to supply at low voltage ("the relevant tariff"), EXCEPT THAT, after billing the energy and demand components of the tariff, a credit will be allowed of –

- 5 percent of the calculated tariff charge where supply is given at voltages of 11kV to 33 kV; and
- 8 percent of the calculated tariff charge where supply is given at voltages of 66 kV and above,

(provided that the calculated tariff charge after application of the credit must not be less than the Minimum Payment or other minimum charge calculated by applying the provisions of the relevant tariff.)

The Service Fee applicable to all high voltage supply given at Tariffs 20, 22, 41 and 43 shall be **\$85.43** and shall be applied after the application of the High Voltage credit.

(iii) Discounts where customer meets certain system costs

Where high voltage customers with recorded maximum demands in excess of 1,000 kilowatts meet certain costs of providing supply from the Powerlink Queensland connection point nearest to their installations, a discount of up to 9 percent may be applicable to the energy and demand charges otherwise assessed at the tariffs herein.

Upon written application by the customer the retail entity will evaluate the level of discount appropriate to the installation in question and will negotiate an agreement with the customer which will take effect from the date of written application.

Card-operated Meters in Remote Communities

If a customer is a small excluded customer for a premises (as defined in section 23 of the Electricity Act), the distribution entity may at its absolute discretion agree with:

- (a) the relevant local government authority on behalf of the customer; and
- (b) the customer's retail entity,

that the electricity consumed by the customer is to be measured and charged by means of a card-operated meter.

If, immediately prior to 1 July 2007, electricity being consumed by a customer at a premises is being measured and charged by means of a card-operated meter, the electricity consumed at the premises may continue to be measured or charged by means of a card-operated meter.

The methodology for applying the appropriate tariffs to customers subject to card-operated meters is as follows:

- (a) If electricity supplied to a domestic customer is measured and charged by means of a card-operated meter:
 - (i) for Tariff 11 (Domestic – Lighting, Power and Continuous Water Heating), all consumption shall be charged at the 'All Consumption' rate (**14.05 cents/kWh**), plus a Service Fee of **\$1.24** per week shall apply;
 - (ii) for Tariff 31 (Night Rate – Super Economy), all consumption shall be charged at the 'All Consumption' rate (**5.73 cents/kWh**), with no Minimum Payment; and
 - (iii) for Tariff 33 (Controlled Supply – Economy), all consumption shall be charged at the 'All Consumption' rate (**8.44 cents/kWh**), with no Minimum Payment.
- (b) If electricity supplied to a business customer is measured and charged by means of a card-operated meter, all consumption shall be charged at the 'All Consumption' rate under Tariff 20 (General Supply) (**15.74 cents/kWh**), plus a Service Fee of **\$2.25** per week shall apply.

Other Retail Fees and Charges

A retail entity may charge its non-market customers the following:

- (a) if, at a customer's request, the retail entity provides historical billing data which is more than two years old – a maximum of **\$30**;
- (b) retail entity's administration fee for a dishonoured payment – a maximum of **\$10**; and
- (c) financial institution fee for a dishonoured payment – no more than the **fee incurred** by the retail entity.

Part 4**CONCESSIONAL APPLICATIONS OF TARIFF 11 (DOMESTIC)**

Tariff 11 – Domestic (Lighting, Power and Continuous Water Heating) is available to customers satisfying the criteria set out in any one of A, B or C, as follows:

- A. Those separately metered installations where all electricity consumed is used in connection with the provision of a Meals on Wheels service or for the preparation and serving of meals to the needy and for no other purpose.**

B. Charitable residential institutions which comply with all the following requirements—

(a) Domestic Residential in Nature

The total installation, or that part supplied and separately metered, must be domestic residential (i.e. it must include the electricity usage of the cooking, eating, sleeping and bathing areas which are associated with the residential usage). Medical facilities, e.g. an infirmary, which are part of the complex may be included as part of the total installation;

and

(b) Charitable and Non-Profit

The organisation must be:

(i) a deductible gift recipient under section 30-227(2) of the *Income Tax Assessment Act 1997* to which donations of \$2.00 and upwards are tax deductible; and

(ii) a non-profit organisation that:

(A) imposes no scheduled charge on the residents for the services or accommodation that is provided (i.e. organisations that provide emergency accommodation facilities for the needy); or

(B) if scheduled charges are made for the services or accommodation provided, then all residents must be pensioners or, if not pensioners, persons eligible for subsidised care under the *Aged or Disabled Persons Care Act 1954*, the *National Health Act 1953* or the *Nursing Homes Assistance Act 1974*.

C. Organisations providing support and crisis accommodation which comply with the following requirements—

The organisation must:

(a) meet the eligibility criteria of the Supported Accommodation Assistance Program (SAAP) administered by the State Department of Communities and is therefore eligible to be considered for funding under this program. (Funding provided to organisations under SAAP is subject to Part 3, Sections 10 to 13 inclusive, of the *Family Services Act 1987*); and

(b) be a deductible gift recipient under section 30-227(2) of the *Income Tax Assessment Act 1997* to which donations of \$2.00 and upwards are tax deductible.

Part 5

QUEENSLAND GOVERNMENT ELECTRICITY REBATE

1. A Queensland Government Electricity Rebate is available to a customer provided the customer:

(a) holds a current and valid card of the following type –

(i) Pensioner Concession Card, issued by either Centrelink or the Department of Veterans' Affairs; or

(ii) Repatriation Health Card for All Conditions (Gold Card) and is in receipt of one of the following payments:

(A) War Widow (including Widowed Mother [AMS] Pension); or

(B) Special Rate T.P.I. (including Blinded Disability) Pension; or

(iii) Queensland Government Seniors Card; and

(b) is a customer of a retail entity at the premises for which the rebate is claimed and the premises is the customer's principal place of residence, and the only residence in Queensland for which the customer claims the rebate; and

(c) lives alone or shares the premises in respect of which the rebate is claimed with:

(i) the customer's spouse; or

(ii) other persons who hold a current and valid card of the type described in paragraph (a) above; or

(iii) other persons wholly dependent on the customer; or

(iv) other persons who receive an income support payment from Centrelink, Family Assistance Office or Department of Veterans' Affairs and who do not pay rent; or

(v) other persons who live with the customer to provide care and assistance and who do not pay rent; and

declares that no other person(s) except casual visitors share the residence with the customer; and

(d) makes application for a rebate either by submitting the relevant form or, at the discretion of the retail entity, by providing the relevant information and declarations by telephone or electronic means.

2. Where an electricity account is in more than one name, and more than one resident is eligible to receive the rebate, each resident may have their eligibility established. However, only one rebate per household will be paid.
3. The retail entity may, at any time, require a new application from a customer and if the customer fails to lodge a new application within the time specified by the retail entity the rebate shall cease.
4. A Queensland Government Electricity Rebate is also applicable to the electricity account of residential home parks and other similar multi-tenanted residential premises provided the following sub-conditions are met:
 - (a) the customer (i.e. the owner or operator of the multi-tenanted residential premises) of the retail entity at the premises concerned –
 - (i) supplies electricity to each of the separately identifiable vans, flats or home units, or other similar living units at the premises; and
 - (ii) charges for electricity on the basis of metered consumption; and
 - (iii) is claiming the rebate on behalf of eligible persons (other than the person being a customer of the retail entity) residing at the premises ('claimant residents'); and
 - (iv) will fully pass on the rebate to each claimant resident by way of a reduction in charges for electricity; and
 - (v) has obtained each claimant resident's authority to:
 - (A) apply for the rebate; and
 - (B) verify the claimant resident's details with Centrelink or the Department of Communities; and
 - (C) disclose their details in connection with eligibility and receiving the rebate; and
 - (vi) has sighted the claimant resident's Pensioner Concession Card, Repatriation Health Card for all Conditions (Gold Card) or Queensland Government Seniors Card (as applicable) at the time the application for the rebate is made, to ensure it is issued in the name of the claimant resident; and
 - (b) each separately identifiable living unit for which the rebate is claimed is occupied for the entire billing period in respect of which the rebate is claimed by persons who, if they had been supplied directly by the retail entity, would have been eligible for the electricity rebate; and
- (c) a rebate is only applicable to claimant residents for electricity consumed in the billing period to which the customer's electricity account relates; and
- (d) a completed rebate application form, in writing, must be produced with the customer's electricity account at the time payment is tendered.
5. The rebate is **\$0.3607** (GST exclusive) per day applied against the dollar and cents value of the electricity consumed based on the applicable (GST exclusive) tariff. Where a retail entity operated in Queensland prior to 1 July 2007 (and calculated the rebate on a monthly basis prior to that date), the retail entity may continue to calculate and credit the rebate on a monthly basis until the earlier of 1 January 2008 and the date the retail entity's systems and processes can accommodate calculation and crediting of rebates on a daily basis. In such cases the rebate is **\$10.97** (GST exclusive) per month applied against the dollar and cents value of the electricity consumed based on the applicable (GST exclusive) tariff.

The rebate paid shall not be greater than the amount billed (excluding GST) for customer retail services provided to the customer in the billing period to which the rebate relates. To avoid doubt, this does not prohibit the retail entity crediting a customer's bill with the full amount of a rebate that is paid retrospectively.
6. The process for application of the rebate is best illustrated by an example where the dollar and cents value of the electricity consumed is \$100.00 in a billing month. Therefore the bill rendered by the retail entity will be \$110.00 (\$100.00 plus GST of \$10.00) less \$12.07 (\$10.97 plus GST of \$1.10). That is the bill will be \$97.93.

Part 6

**RELIEF FROM ELECTRICITY CHARGES WHERE
DROUGHT DECLARATION IN FORCE****Customers of Ergon Energy Queensland Pty Ltd**

A customer of Ergon Energy Queensland Pty Ltd who is a farmer in a drought declared area or whose property is individually drought declared under Queensland Government administrative processes is eligible for one or more of the following forms of relief from electricity charges:

(A) Tariff 68 – Irrigation Pumping in Drought Declared Area

A customer of Ergon Energy Queensland Pty Ltd who is a farmer in a drought declared area or whose property is individually drought declared may transfer individually metered irrigation pumping loads to this tariff until the drought declaration is revoked: Provided that, if water pumping time restrictions continue to apply after the drought declaration is revoked, the customer may remain on this tariff until the water pumping time restrictions are lifted or until 12 months after the revocation of the drought declaration, whichever is the earlier.

All consumption **12.90 c/kWh**

The conditions set out in Part 3, applicable to customers changing from one tariff to another, do not apply in the case of a customer who transfers individually metered irrigation pumping loads to or from this Tariff 68.

(B) Waiving of Fixed Charge Components of Electricity Charges

If a customer of Ergon Energy Queensland Pty Ltd who is a farmer in a drought declared area or whose property is individually drought declared has no water to pump, the fixed components of the customer's electricity charges shall be waived. These fixed charge components include minimum payments, service fees, annual fixed charges under Tariff 66 and guarantee agreement shortfall charges.

Provided the drought declaration remains operative, the waiver applies to all fixed charges applicable to any account covering the period in which pumping ceased and to any subsequent account until the customer once again has water to pump. If the operative drought declaration is revoked before the customer once again has water to pump, the waiver shall continue to apply until water is available or until 12 months after the revocation of the drought declaration, whichever is the earlier.

(C) Deferral of Payment

If a customer of Ergon Energy Queensland Pty Ltd who is a farmer in a drought declared area or whose property is individually drought declared cites financial difficulties as a result of the drought, the customer is entitled to defer payment of the customer's electricity accounts relating to farm consumption.

Ergon Energy Queensland Pty Ltd may charge interest on deferred accounts. However, the rate of any interest charged must not be more than the Bank Bill reference rate for 90 days, as published on the first business day of each quarter.

Subject to the maximum rate of interest that may be charged, the terms of the deferred payment and the repayment of deferred amounts following revocation of the drought declaration will be as agreed between Ergon Energy Queensland Pty Ltd and the customer concerned.

Eligibility for Relief

A customer of Ergon Energy Queensland Pty Ltd seeking relief from electricity charges, including a transfer of irrigation pumping loads to Tariff 68, on the basis that the customer is a farmer who is in a drought declared area or whose property is individually drought declared, must apply in writing to Ergon Energy Queensland Pty Ltd.

If required by Ergon Energy Queensland Pty Ltd, the customer must provide:

- (a) evidence that the customer's property is in a drought declared area or is individually drought declared, including the effective date of such drought declaration;
- (b) evidence of the water pumping restrictions applicable to the customer's property; and
- (c) evidence that the customer is experiencing financial difficulties as a result of the drought.

Non-market customers of other retail entities

Non-market customers of retail entities other than Ergon Energy Queensland Pty Ltd who are farmers in drought declared areas or who have a property which is individually drought declared under Queensland Government administrative processes can apply directly to the Department of Mines and Energy for relief from electricity charges as outlined in (B) above.

Non-market customers of other retail entities taking supply under Tariff 68 at 30 June 2007 will be supplied under other tariffs appropriate to their installations.

QUEENSLAND GOVERNMENT VACANCIES GAZETTE

The Queensland Public Service is committed to equal opportunity in employment. Selection will be given on the basis of merit only and fair consideration will be given to all applicants. The Queensland State Government's policy is to seek to retain skilled staff. Registered employees who apply for an advertised job will be considered before other applicants. The symbol (h) appears next to vacancies where an exemption from this requirement applies. Employees are to indicate in their application for the advertised job that they are registered with the Office of the Public Service Commissioner. The Queensland Public Service Commissioner is committed to equal opportunity in employment. Selection will be given on the basis of merit only and fair consideration will be given to all applicants.

CONTINUOUS APPLICANT POOLS

A continuous applicant pool allows you to apply for jobs within an occupation where vacancies are regularly available. This means that agencies can 'dip' into the pool for suitable applicants as soon as they have a vacancy. You can submit or refresh your application at any time. If you are refreshing your application, make sure that you indicate this either on your email or, if sending by post, in a covering letter. In search results, continuous applicant pools can be identified by 'Ongoing' in the 'Closes' column of a search result.

Note: If a continuous applicant pool is closing, applicants will be notified two weeks prior to this date. Applications may be used for up to six months after the pool closes.

MULTI-AGENCY POOLS

Some Queensland Government agencies are on the lookout for people to fill similar jobs or occupations at the same time. Some of these jobs have a fixed closing date and others are ongoing (continuous applicant pools). With multi-agency pools, you only have to apply once to access job opportunities across participating agencies. Your application will then be able to be viewed and assessed by all the agencies in that pool - or, if you prefer, you can specify that you want to be considered only for particular agencies. Make sure you check the specific vacancy to find out how each pool works.

HOW TO APPLY

When you have found the job you would like to apply for.

1. You can phone for a copy of the information kit or you can download the documents from the Smart Jobs and Careers website at www.jobs.qld.gov.au. The information kit will include:
 - the position or job description detailing: background of the department or work area; roles and responsibilities, and selection criteria
 - a job information package, outlining the procedure for preparing and sending in your application, and
 - an application cover sheet.
2. Do your homework - research the agency to understand the background to the job.
3. Prepare your application. This should include your:
 - completed cover sheet (available on jobs online or in the kit mailed to you)
 - covering letter
 - resumé / curriculum vitae
 - names and contact details of (2) referees, and
 - responses to the selection criteria if required.
4. Mail or email your application (Details of where and how are available in either the job description or the job information package).

Check with the job vacancy contact person if you are unsure about how or where to submit your application or how many copies to send. Make sure you send your application by the closing date. If you don't, it may not be accepted. Once your application is received, you will usually be sent a written acknowledgement.

When applying for Continuous Applicant Pools, please check each vacancy for application instructions.

DO YOU HAVE A RELATIVE OR FRIEND BURIED IN KANDANGA CEMETERY?

The Kandanga Cemetery will be affected by the proposed Traveston Crossing Dam.

The Community Futures Task Force is examining the options available to people who have loved ones buried in the cemetery.

The Task Force is seeking to contact families, relatives and friends with loved ones in the Kandanga Cemetery to discuss their wishes for the future of the cemetery.

Options to date include:

- establishing a grassy verge along the front of the cemetery to protect it from flooding at Stage 1 to ensure all graves remain unaffected by the dam and floods,
- building the cemetery up to a level above predicted water lines and accurately repositioning the headstones directly above the existing graves,
- extending the current cemetery or identifying another site to develop a new Mary Valley Cemetery; or
- relocating graves by exhumation to another site of a family's choice.

If you have a loved one(s) buried in Kandanga Cemetery please call the Community Futures Task Force on **1800 133 258** for a confidential discussion or for more information on these options and timelines.

Alternatively, you can contact the Task Force by emailing info@communityfutures.qld.gov.au
