Long wait	A 'long wait' elective surgery patient is one who has waited longer than the clinically recommended time for their surgery, according to the clinical urgency category assigned. That is, more than 30 days for a category 1 patient, more than 90 days for a category 2 patient and more than 365 days for a category 3 patient.

Glossary of terms (continued)

Nurse Navigator	Highly experienced nurses who have an in-depth understanding of the health system and who will assist patients with complex healthcare needs to navigate to and from their referring general practitioner and/or other primary care providers, through hospital, the community and back home again.
Nurse practitioner	A registered nurse educated and authorised to function autonomously and collaboratively in an advanced and extended clinical role. The nurse practitioner role includes assessing and managing clients using nursing knowledge and skills and may include, but is not limited to, direct referral of clients to other healthcare professionals, prescribing medications, and ordering diagnostic investigations.
Occasions of service	Occasions of service include any examination, consultation, treatment or other service provided to a non-admitted patient in each functional unit of a health service facility, on each occasion such service is provided
Outpatient	Non-admitted health service provided or accessed by an individual at a hospital or health service facility.
Outpatient service	Examination, consultation, treatment or other service provided to non-admitted non-emergency patients in a speciality unit or under an organisational arrangement administered by a hospital.
Patient flow	Optimal patient flow means the patient's journey through the hospital system, be it planned or unplanned, happens in the safest, most streamlined and timely way to deliver good patient care.
Performance indicator	A measure that provides an 'indication' of progress towards achieving the organisation's objectives and usually has targets that define the level of performance expected against the performance indicator.
Private hospital	A private hospital or free-standing day hospital, and either a hospital owned by a for-profit company or a non-profit organisation and privately funded through payment for medical services by patients or insurers. Patients admitted to private hospitals are treated by a doctor of their choice.

Public patient	A public patient is one who elects to be treated as a public patient, so cannot choose the doctor who treats them, or is receiving treatment in a private hospital under a contract arrangement with a public hospital or health authority.
Public hospital	Public hospitals offer free diagnostic services, treatment, care and accommodation to eligible patients.
