

Meeting Communique – 4 April 2025

The Queensland Energy System Advisory Board (the Board) held their fifth meeting online on 4 April 2025.

Queensland Treasury outlined progress on the electricity system modelling for the new Energy Roadmap, to be delivered in 2025. The focus of the presentation was the proposed input assumptions and draft electricity scenarios for the next phase of electricity system modelling. The Board discussed and provided feedback on the assumptions and scenarios, which Queensland Treasury will incorporate.

The Board discussed the importance of a resilient electricity system and the need to maintain social licence as the energy system changes.

The Board also endorsed an amended Terms of Reference and Forward Work Program that reflects the Queensland Government's priorities for energy policy and machinery of government changes for the Department.

Next Meeting

The next meeting will be in May 2025.
