Gambling groups

Note: Due to rounding, figures may not equal 100%. Graphics are indicative - not to exact scale.

It is important to note that while the terms “problem gambling” and “problem gambler” are generally considered to be stigmatising when used to describe those experiencing or at risk of experiencing gambling harm, the usage of “problem gambling” or “problem gambling group” in this report reflects the official terminology of the screening tool used and represents those respondents who scored 8 or more on the Problem Gambling Severity Index.
