Subject

Tugun Comp Habitat

Michael,

As discussed earlier today we are satisfied that the assessment carried out on Blocks 18 and 19 is adequate for the requirements for compensator habitat for the relevant Wallum Frog species and Planigales for the Tugun Project.

We look forward to the finalisation of this matter as soon as practical.

If you have any questions please give me a call.

Thanks

Graeme Budd

Subject

Tugun Bypass Compensatory Habitat -Environmental Investigation Report
into Skinners Shoot & Broadwater Blocks

Hello Neil,

The Department is satisfied with the survey that has been carried out on Site 18 as compensatory habitat for the wallum froglet and coastal planigale as part of the Tugun Bypass Project, and that no further survey work targeting the planigale is required.

Please call me if you have any questions.

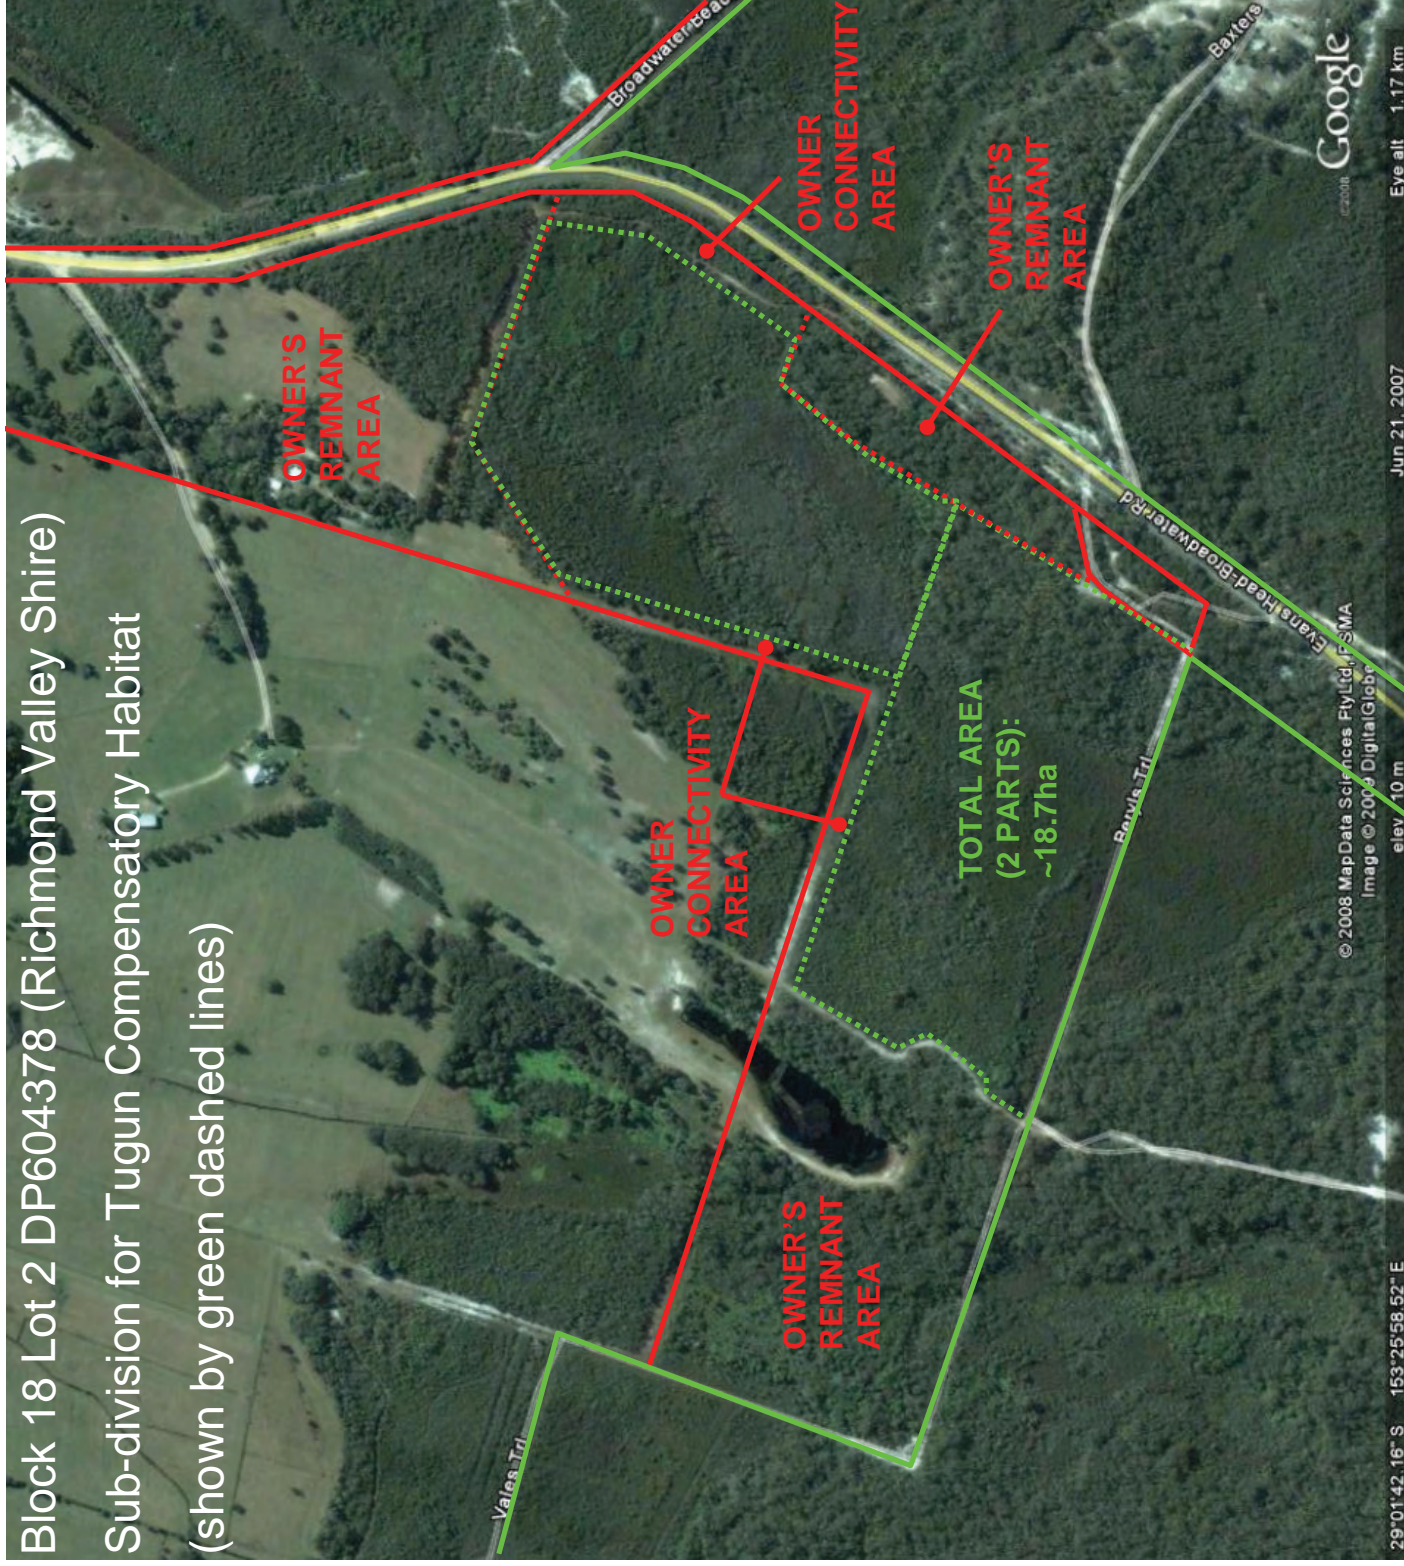

Regards

Michael Young
