QUEENSLAND GOVERNMENT VACANCIES GAZETTE

The Queensland Public Service is committed to equal opportunity in employment. Selection will be given on the basis of merit only and fair consideration will be given to all applicants. The Queensland State Government's policy is to seek to retain skilled staff. Registered deployees who apply for an advertised job will be considered before other applicants. The symbol (h) appears next to vacancies where an exemption from this requirement applies. Deployees are to indicate in their application for the advertised job that they are registered with the Office of the Public Service Commissioner. The Queensland Public Service Commissioner is committed to equal opportunity in employment. Selection will be given on the basis of merit only and fair consideration will be given to all applicants.

CONTINUOUS APPLICANT POOLS

A continuous applicant pool allows you to apply for jobs within an occupation where vacancies are regularly available. This means that agencies can 'dip' into the pool for suitable applicants as soon as they have a vacancy. You can submit or refresh your application at any time. If you are refreshing your application, make sure that you indicate this either on your email or, if sending by post, in a covering letter. In search results, continuous applicant pools can be identified by 'Ongoing' in the 'Closes' column of a search result.

Note: If a continuous applicant pool is closing, applicants will be notified two weeks prior to this date. Applications may be used for up to six months after the pool closes.

MULTI-AGENCY POOLS

Some Queensland Government agencies are on the lookout for people to fill similar jobs or occupations at the same time. Some of these jobs have a fixed closing date and others are ongoing (continuous applicant pools). With multi-agency pools, you only have to apply once to access job opportunities across participating agencies. Your application will then be able to be viewed and assessed by all the agencies in that pool - or, if you prefer, you can specify that you want to be considered only for particular agencies. Make sure you check the specific vacancy to find out how each pool works.

HOW TO APPLY

When you have found the job you would like to apply for.

1. You can phone for a copy of the information kit or you can download the documents from the Smart Jobs and Careers website at www.jobs.qld.gov.au. The information kit will include:
 - the position or job description detailing: background of the department or work area; roles and responsibilities, and selection criteria
 - a job information package, outlining the procedure for preparing and sending in your application, and
 - an application cover sheet.
2. Do your homework - research the agency to understand the background to the job.
3. Prepare your application. This should include your:
 - completed cover sheet (available on jobs online or in the kit mailed to you)
 - covering letter
 - resumé / curriculum vitae
 - names and contact details of (2) referees, and
 - responses to the selection criteria if required.
4. Mail or email your application (Details of where and how are available in either the job description or the job information package).

Check with the job vacancy contact person if you are unsure about how or where to submit your application or how many copies to send. Make sure you send your application by the closing date. If you don't, it may not be accepted. Once your application is received, you will usually be sent a written acknowledgement.

When applying for Continuous Applicant Pools, please check each vacancy for application instructions.

The Coordinator-General may authorise other people to exercise those rights and powers.
- (b) The Coordinator-General shall have the right to authorise, permit or license other parties to use the Easement Area for all or any of the purposes as the Coordinator-General may do so under the Easement, and otherwise to exercise the same rights and powers as the Coordinator-General under the Easement subject to all the conditions and restrictions upon such rights as are set out in the Easement.

Any such action shall be taken without the Coordinator-General or persons authorised, permitted or licensed by the Coordinator-General incurring any liability to the Landowner.

3. RIGHTS AND OBLIGATIONS OF LANDOWNER

- (hh) the Landowner must not grant any rights to any person in relation to the Easement Area to the extent the granting of those other rights could or will conflict or interfere with the Infrastructure or the exercise of any of the Coordinator-General's rights and powers under the Easement.

4. OTHER MATTERS

4.1 Ownership of Infrastructure

All Infrastructure and other things brought onto or installed on the Easement Area from time to time by the Coordinator-General will, as between the Landowner and the Coordinator-General, notwithstanding any affixation to the Easement Area, remain the property of the Coordinator-General.

If the Coordinator-General or a person authorised, permitted or licensed by the Coordinator-General to use the Easement Area pulls down or breaks open any fencing under the Easement:

The Coordinator-General must:

The Landowner must use best endeavours to give the Coordinator-General a copy of any notification received by the Landowner in respect of any application for a mining or petroleum tenement under the *Mineral Resources Act 1989*, the *Petroleum Act 1923*, the *Petroleum and Gas (Production and Safety) Act 2004* or any similar or replacement legislation, in respect of land which includes all or any part of the Easement Area, within 7 days after the Landowner receives such notification.

4.6 Further assurances

The Landowner will execute every deed, instrument, assurance or other document and do all such things as may be necessary to secure the rights of the Coordinator-General conferred by the Easement as the Coordinator-General may reasonably require, including (without limitation) obtaining the consent of any person necessary and producing the title document for the Easement Area and executing all documents necessary to give effect to any proposed assignment, transfer, encumbrance or other dealing by the Coordinator-General in respect of the Easement Area.

- (c) It will be reasonable for the Coordinator-General to refuse or withhold its consent if the actions of the Landowner are, in the Coordinator-General's opinion, likely to jeopardise the safety, security or operation of, or interfere with the Infrastructure or restrict the Coordinator-General's access along or across the Easement Area.

6. SEVERABILITY

- (a) Subject to clause 6(b), if a provision of the Easement is illegal or unenforceable in any relevant jurisdiction, it may be severed for the purposes of that jurisdiction without affecting the enforceability of the other provisions of the Easement.

DIRECTION TO INVESTIGATE SMALL CUSTOMER GAS PRICING AND COMPETITION IN QUEENSLAND***Gas Supply Act 2003***

Pursuant to my authority under sections 227A and 270K of the *Gas Supply Act 2003*, I hereby direct the Queensland Competition Authority (QCA) to investigate pricing and the effectiveness of retail competition in the Queensland retail gas market. The QCA is to give me a report on its investigation by 1 December 2008.

The terms of reference for the investigation are set out in the following schedule.

Dated this 2nd day of May 2008.

GEOFF WILSON MP
Minister for Mines and Energy

REVIEW OF SMALL CUSTOMER GAS PRICING AND COMPETITION IN QUEENSLAND**TERMS OF REFERENCE****Background**

Deregulation of natural gas tariffs coincided with the start of Full Retail Competition (FRC) in gas on 1 July 2007. Deregulation allowed gas retailers to further move towards cost-reflective pricing which had initially commenced in 2005 with a number of increases in gas tariffs higher than the consumer price index. The aim of these policies is to encourage further development of the State's natural gas market. Gas prices for small customers were cross-subsidised and generally well below cost prior to 1 July 2007.

The move to cost reflectivity affected individual consumers differently. Depending on location, some household consumers with gas cooking and a gas hot water system faced a cost increase, whilst other customers may have experienced reductions in their gas bills.

However, some smaller residential customers (for example those with gas cooking only) experienced more significant price rises. The price changes had a greater impact on small gas users because fixed charges (including network and retail costs) now make up a larger proportion of their total gas bill, as retailers move to reflect the structure of the costs they face in retail pricing. Also, because of the high proportion of fixed charges in their bills, there is little scope for smaller customers to mitigate the increase by lowering consumption.

Looking forward, the gas retailers have not provided any firm indication of the likely increases still required to achieve cost-reflectivity in natural gas tariffs, or the price changes that may take place later in 2008 or later.

To help alleviate the difficulties faced by some smaller customers, on 16 October 2007 the Government announced a \$55 per year rebate for eligible seniors and pensioners who have reticulated natural gas. This rebate was targeted at meeting a substantial part of the increase in fixed charges borne by those affected small customers least likely to be able to absorb the increase.

A number of additional Queensland Government initiatives have been implemented to assist residential gas customers and grow the residential gas market. These include the Sustainable Housing Code, Queensland Residential Gas Installation Rebate Scheme and the phase-out of electric hot water systems.

These initiatives have the potential to reduce gas prices to customers by spreading distribution costs over a growing customer base. The Queensland Government anticipates that, as customer numbers grow and the utilisation of the system improves, the average cost to the consumer will reduce over time. In addition, growth in the residential market may attract additional retailers into Queensland, increasing competition and potentially lowering prices.

Significant residential areas in Queensland do not have access to reticulated natural gas and many current gas customers use Liquefied Petroleum Gas (LPG), either through a reticulated network, or more commonly bottles. The price of LPG is set at world prices. Given the growing demand for LPG internationally, it is understood that the price of LPG is also increasing beyond the consumer price index annually.

In this context, it is timely for the Queensland Competition Authority to undertake a Review of Small Customer Gas Pricing and Competition in Queensland.

The Queensland Government is currently developing a Queensland Residential Gas Market Strategy. The objective is that the outcomes of this Review will determine whether any additional measures need to be combined with existing initiatives, to improve competitive market outcomes for gas customers, incumbent retail market participants and new entrants.

Head of Power

The *Gas Supply Act 2003* includes the provision to enable Direction by the Minister to investigate a number of areas in relation to pricing and retail competition within the gas industry in Queensland.

Under Chapter 3, Part 4, Division 1, Section 227A the Minister may, by gazette notice, give the Queensland Competition Authority a written direction to:

- investigate the effectiveness of retail competition in the Queensland retail gas market; and
- give the Minister a report on the pricing investigation within a stated period.

Under Chapter 5, Part 3, Section 270K, the Minister may, by gazette notice, give the QCA a written direction to conduct a review into:

- any matter relating to the Queensland reticulated processed natural gas markets.

Objectives

As Minister, I wish to ensure that consumers of gas in Queensland benefit from competition and efficiency in the market place. This includes reticulated natural gas and its alternatives, reticulated and bottled Liquefied Petroleum Gas.

Accordingly, I direct the QCA to undertake a Review of Small Customer Gas Pricing and Competition in Queensland.

This review should examine current market issues in the interests of gas customers, incumbent retail market participants and new entrants.

Matters to be Considered

In undertaking the Review of Small Customer Gas Pricing and Competition in Queensland, the QCA is to consider and report on the following issues:

1. The level of competition in the reticulated natural gas market, and as a comparison, other substitute fuels including reticulated and bottled LPG in Queensland. This should include an assessment of the following components:
 - Current competition within the small customer gas market (Refer to point 3);

- Changes in market competitiveness over time, and the potential for future competition within the small customer gas market;
 - Ability of retailers to enter the market, including barriers to entry across the gas market supply chain, and expansion of the gas retail market;
 - Relevant gas market supply constraints; and
 - The impact of competition in the small customer gas market on the profitability of the reticulated natural gas distribution areas.
2. The impact of movements in upstream gas costs on the current prices paid by small customers including an assessment of:
- Wholesale gas prices;
 - Transmission costs;
 - Distribution costs;
 - Retail operating costs; and
 - Retail margin.

The QCA should consider movement of these costs over time, and the potential for future changes in costs.

Based on the above outcomes, the QCA should provide comment on whether current Queensland small customer prices are reflective of the actual costs incurred in the upstream gas supply chain. If the QCA considers that prices are not cost reflective, the QCA should comment on the price adjustments necessary to achieve cost reflectivity.

3. Current small customer gas market activity, including:
- The exercise of market choice and switching behaviour by consumers and any technical or other barriers to this;
 - Any impediments to small customers being able to exercise informed choices regarding their retailer of choice; and
 - The perceptions of natural gas as a product of choice in the small customer market compared to other energy supply options.
4. The QCA should consider how each of these issues affects different categories of small gas customer, for example, small commercial customers, domestic customers with gas cooking only and domestic customers with gas cooking and a gas hot water system.
5. Where relevant, the QCA should comment on differences in market competitiveness and cost reflectivity between regions within Queensland.
6. The QCA should provide analysis of differences in market competitiveness and cost reflectivity between Queensland and other Australian States or Territories. This should include consideration of other recent reviews of gas pricing and competition in other jurisdictions or nationally, where relevant to this Review.

Any other issues not explicitly mentioned here which arise during the course of the Review, and which impact on the Review's objectives or matters being considered, should, where relevant, be included in the report to the Minister.

Definitions

For the purpose of this Review, a "small customer" is consistent with that defined in the *Gas Supply Regulation 2007* as one consuming less than 1 terajoule of gas per annum per connection.

Consultation

In conducting this review, the QCA is requested to invite submissions from stakeholders to the extent to which it considers necessary or desirable.

Reporting Period

The QCA must submit its report on its Review of Small Customer Gas Pricing and Competition in Queensland in its final form to the Minister no later than 1 December 2008.
