# Introduction

Locks used on gaming machines in Queensland are approved under the *Gaming Machine Act 1991*, as security devices under the *Casino Control Act 1982*, and against other provisions such as the Australian/New Zealand Gaming Machine National Standard, and related requirements and guidelines where applicable. This document informs licensees and other interested parties which lock models are approved for gaming machines and also includes other pertinent information.

## Scope

This document is applicable to Queensland casinos and licensed venues in Queensland.

## Definitions / Abbreviations

**OLGR** – The Office of Liquor and Gaming Regulation

## General

3.1 The following locks have been approved by OLGR for use in gaming machines:

- Abloy SAI
- Abloy Disklock Pro
- Abloy Exec
- Abloy Protec CL200N Camlock
- Abloy Sentry CL103B/CP, CL104B/CP, CL200B/CP
- Assa Desmo
- Bi-Lock 101, 102 & 202
- Kaba Quartro
- Medeco
- MIWA LS10-MG (Approved Security Device under the *Casino Control Act 1982*)
- MIWA LS7 and LS10 programmable locks
- Rielda Reprogrammable Gaming Machine Cam Lock 510
- Rielda Reprogrammable Gaming Machine Cam Lock 519
- Videx Cyberlock

3.2 Locks with a different common key to machine cabinets will be required for the consoles. It is the site operator's responsibility to purchase these locks and have them installed prior to the installation of the gaming machine.

3.3 Jackpot reset and audit keys for all gaming machines can be obtained from the relevant gaming machine manufacturer.

3.4 Note acceptors at a minimum require two extra locks: one lock for the note receptacle (stacker) door and one for the note acceptor receptacle, which may be keyed alike to the console, but not the machine door. A separate key for note acceptors is also acceptable.

- 3.5 Any other lockable cabinet that allows entry into a gaming machine or its components must have the appropriate lock installed. For example, a casino top that has provision to have a lock installed must have the appropriate lock installed.
- 3.6 Not all approved locks are suitable for all applications. OLGR will only deem a lock to be suitable for that application if it meets its intended purpose, does not adversely affect the security or integrity of the gaming machine (e.g. difficulty in closing the main door), and does not pose any safety concerns when installed.

## Revision History

Version	What	Who	Date
1.5	Update to new minimum requirements template & general review	LC & RL	8/9/2008
1.6	Updated to new DEEDI report document template	YL	20/8/2010
