### **RELIEF FROM ELECTRICITY CHARGES WHERE DROUGHT DECLARATION IN FORCE**

The following outlines relief assistance available for Queensland farmers located in drought declared areas or whose properties are individually drought declared under Queensland Government administrative processes. Assistance is available through waivers or reimbursements of certain fixed charge components of relevant electricity accounts. Customers of Ergon Energy Queensland Pty Ltd may also apply for deferral of electricity charge payments. For information about current drought declared areas and the declaration process visit [www.business.qld.gov.au/industries/farms-fishing-forestry/agriculture/rural-disaster-recovery/drought/declarations-revocations](http://www.business.qld.gov.au/industries/farms-fishing-forestry/agriculture/rural-disaster-recovery/drought/declarations-revocations).

#### **Customers of Ergon Energy Queensland Pty Ltd**

A Standard Contract Customer of Ergon Energy Queensland Pty Ltd who is a farmer in a drought declared area or whose property is individually drought declared under the Queensland Government administrative processes, may apply for one or more of the following forms of relief from electricity charges:

**(A) Waiving of fixed charge components of electricity charges**

If a customer of Ergon Energy Queensland Pty Ltd who is a farmer located in a drought declared area or whose property is individually drought declared, does not have access to, or has severely restricted access to, farm or irrigation water, the customer may apply for a waiver of fixed charge components of the customer's electricity account. These fixed charge components include the daily supply charge, metering charge and annual fixed charge but exclude minimum demand charges as set out in the Retail Electricity Prices for Standard Contract Customers Tariff Schedule.

Provided the drought declaration remains operative, the waiver applies to all eligible fixed charges applicable to any account being used primarily for pumping water for farm or irrigation purposes. The waiver shall continue to apply until the drought declaration is revoked.

**(B) Deferral of payment**

If a customer of Ergon Energy Queensland Pty Ltd who is a farmer in a drought declared area or whose property is individually drought declared, does not have access to or has severely restricted access to farm or irrigation water and experiences financial difficulties as a result of the drought, the customer may apply to defer payment of the customer's electricity accounts relating to farm or irrigation usage. In applying for payment deferrals, the customer may be required to provide supporting evidence, such as a statement of financial position prepared and certified by a financial counsellor/adviser or the customer's bank or accountant or a statutory declaration.

Ergon Energy Queensland Pty Ltd may charge interest on deferred accounts. However, the rate of any interest charged must not be more than the Bank Bill reference rate for 90 days, as published on the first business day of each quarter.

A deferral period beyond 12 months (or such other period agreed by Ergon Energy Queensland Pty Ltd may be subject to review of the customer's circumstances by Ergon Energy Queensland Pty Ltd. Ongoing bill deferrals are subject to the customer engaging with Ergon Energy Queensland Pty Ltd regarding repayment of the deferred amount plus the payment of any future energy usage charges.

**Eligibility for relief**

A customer of Ergon Energy Queensland Pty Ltd seeking relief from electricity charges on the basis that the customer is a farmer who is in a drought declared area or whose property is individually drought declared, must apply in writing to Ergon Energy Queensland Pty Ltd, using the appropriate application form.

The customer may apply at any time from the commencement date of the drought declaration relevant to their area or individual property. Claims may be made for invoices within six months of the date of issue of the electricity invoice for which relief is being sought. Claims may not precede the commencement date of the relevant drought declaration.

On 1 July 2021, the Queensland Government introduced the Electricity Tariff Adjustment Scheme (ETAS). ETAS works independently of DRECS and offers transitional assistance for businesses supplied by Ergon Energy Queensland Pty Ltd that face a significant increase in electricity charges when switching from obsolete tariffs to standard retail tariffs. Where a customer is receiving transition rebates via ETAS, the customer will continue to be eligible for DRECS. If the ETAS benefit is greater than the DRECS benefit, the difference shall be applied under ETAS. When backdating a DRECS waiver, only the value of the backdated DRECS above the value of the ETAS transition rebate already received for the backdated period is payable.

The customer must provide the following as part of their DRECS application:

- a) evidence that the customer's property is in a drought declared area or is individually drought declared, including the effective date of such drought declaration;
- b) confirmation that the water pumping restrictions apply to the customer's property;
- c) a statutory declaration stating the specific electricity account(s); that the connection is normally used primarily for pumping water for farm or irrigation purposes; and that the customer has no, or severely restricted access, to water;
- d) if the connection has other use(s), other than water pumping, the approximate proportion of electricity normally used for pumping water for farm or irrigation purposes when not drought declared (to be included in the statutory declaration provided under paragraph c); and
- e) supporting evidence of financial difficulties, such as a statement of financial position or a statutory declaration.

For all customers who are recipients of DRECS on 31 December 2021, the following will apply from 1 January 2022:

- To continue receiving DRECS, small customers (consuming less than 100 megawatt hours (MWh) per annum) must be supplied on the regulated retail tariff they were supplied on as at 31 December 2021 or when their application for DRECS was made, whichever is the latter;
- To continue receiving DRECS, large customers (consuming 100MWh or more per annum) must be supplied on the regulated retail tariff that provides the DRECS recipient's relevant NMI the lowest annual charge without taking into account the assistance provided by DRECS, excluding controlled tariffs and based on the capabilities of the NMI's meter.

#### **Customers of other retailers**

Customers of retailers other than Ergon Energy Queensland Pty Ltd who are farmers in drought declared areas or who have a property which is individually drought declared under Queensland Government administrative processes can apply directly to the Department of Energy and Public Works.

If a farmer as a result of drought does not have access to, or has severely restricted access to, normal or usual supplies of farm or irrigation water, the fixed components of the customer's electricity charges will be reimbursed. These fixed

charge components include the daily supply charge, metering charge, and annual fixed charge but exclude minimum demand charges. To be eligible, the customer must apply within six months of the date of issue of the electricity invoice for which relief is being sought. If the electricity invoice is dated prior to the date of commencement of the drought declaration, the reimbursement will only apply to the component from the date of commencement of the drought declaration.

Customers must attach a statutory declaration stating the specific account(s); that the connection is normally being used primarily for pumping water for farm or irrigation purposes; and that the customer has no, or severely restricted, access to water. If the connection has other use(s), other than water pumping, the approximate proportion of electricity normally used for pumping water for farming or irrigation use when not drought declared must be stated in the statutory declaration.

Provided the drought declaration remains operative, the reimbursement applies to all eligible fixed charges applicable to any account being used primarily for pumping water for farm or irrigation purposes and ceases once the drought declaration is revoked.

For all customers who are recipients of DRECS on 31 December 2021, the following will apply from 1 January 2022:

- To continue receiving DRECS, small customers (consuming less than 100 megawatt hours (MWh) per annum) on a regulated retail tariff must be supplied on the tariff they were supplied on as at 31 December 2021 or when their application for DRECS was made, whichever is the latter;
- To continue receiving DRECS, large customers (consuming 100MWh or more per annum) on a regulated retail tariff must be supplied on the tariff that provides the DRECS recipient's relevant NMI the lowest annual charge without taking into account the assistance provided by DRECS, excluding controlled tariffs and based on the capabilities of the NMI's meter.
