

Proposed Project Scope

Regional Jobs Committee program 2025-27

Purpose

This proposed project scope is a critical element of the application that describes a potential approach for the Committee in delivering the program in applying itself to demonstrated and local workforce needs.

This scope is intended to allow the proponents to demonstrate their understanding of **local skilling and workforce that target skills gaps in critical industry sectors** in their nominated region.

It is recognised that the scope is indicative and while not binding, may well inform the formalisation of the Action Plan by the successful organisation.

Please upload this proposed project scope to your application as an attachment in JIRA.
