

# THE GREAT SCAM!

...and Kit Kat...

By Larissa

Ding Dong

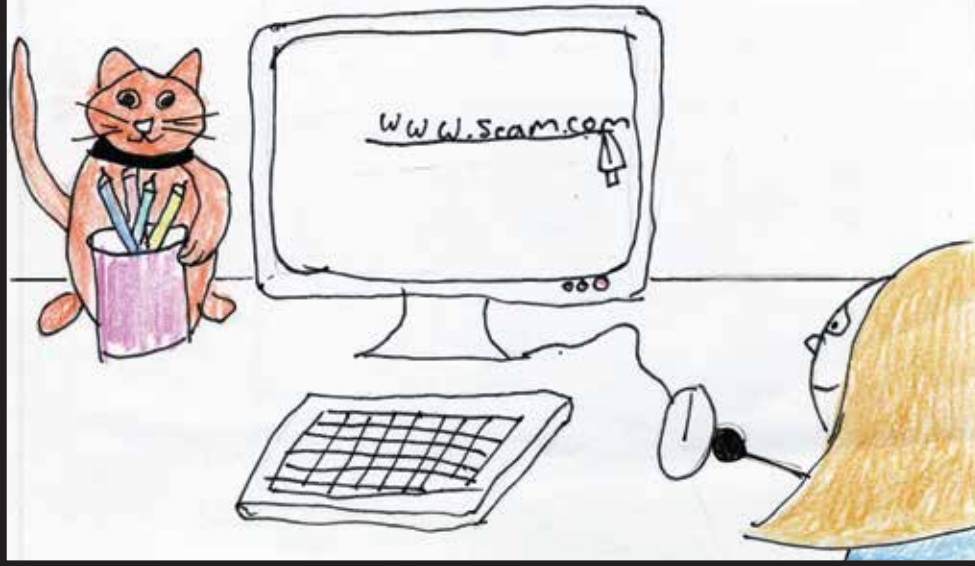

Hello I'm Ned and I'm from Tech Protect and we sell software to protect your computer from Scams

Oh, what a good idea, but I don't think I need it. I would never be caught by a scammer!

for instance I would never open an attachments in a email

I always have a different password for every account

I don't respond to emails from banks and always go to their website.

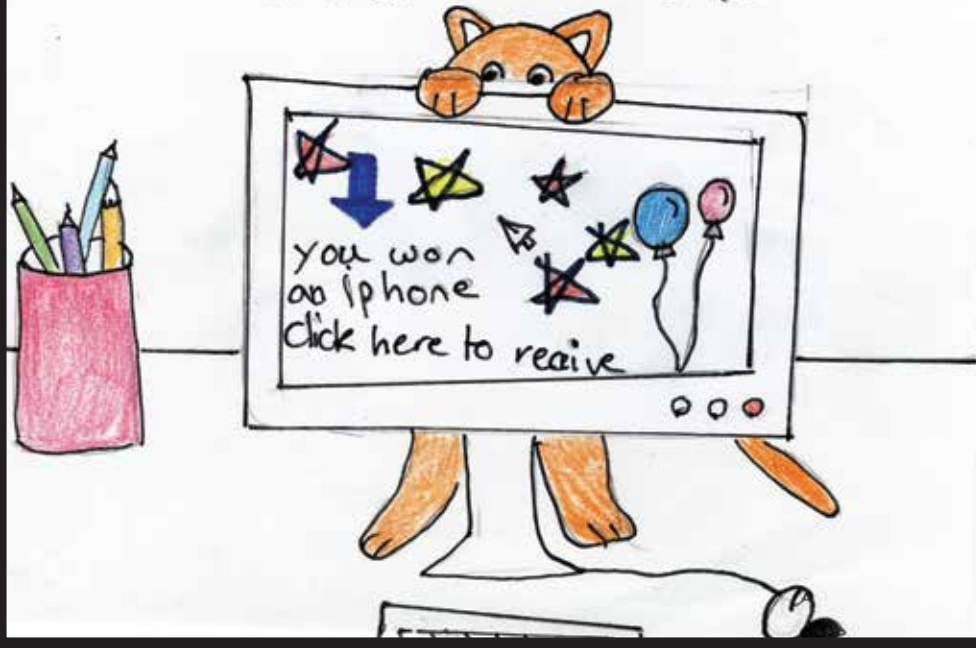

I love you! But I need \$2000 to get to Australia!

And I'd never send money to someone I've never met.

oh and I don't click on popups

Very good!  
I'm glad you take  
your online  
security seriously.  
Our Tech Protect  
product will be  
a helpful backup.

Sound helpful  
Ned, thanks!

Great! Just write down your  
card details so we can email you  
the product key.
