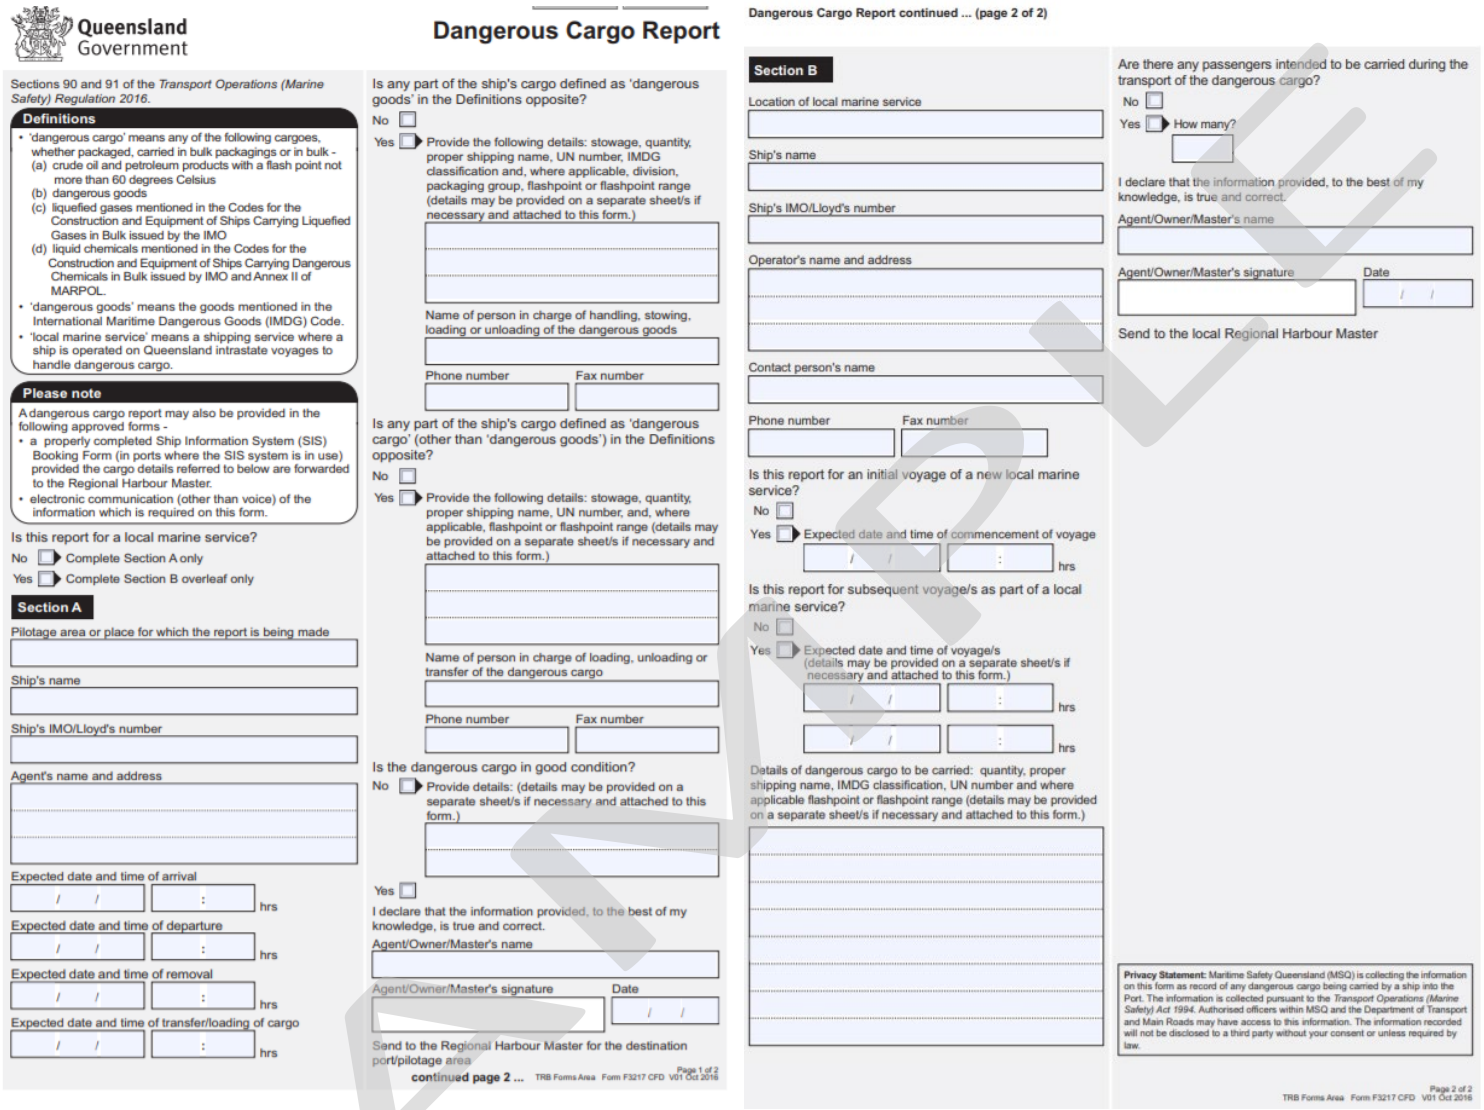
Please follow this link to access the official fillable PDF form: F3217 - Dangerous Cargo Report

This is a replica of the form and is not intended to be used



Queensland Government

Dangerous Cargo Report

Sections 90 and 91 of the *Transport Operations (Marine Safety) Regulation 2016*.

Definitions

- 'dangerous cargo' means any of the following cargoes, whether packaged, carried in bulk packagings or in bulk -
  - (a) crude oil and petroleum products with a flash point not more than 60 degrees Celsius
  - (b) dangerous goods
  - (c) liquefied gases mentioned in the Codes for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk issued by the IMO
  - (d) liquid chemicals mentioned in the Codes for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk issued by IMO and Annex II of MARPOL.
- 'dangerous goods' means the goods mentioned in the International Maritime Dangerous Goods (IMDG) Code.
- 'local marine service' means a shipping service where a ship is operated on Queensland intrastate voyages to handle dangerous cargo.

Please note

A dangerous cargo report may also be provided in the following approved forms -

- a properly completed Ship Information System (SIS) Booking Form (in ports where the SIS system is in use) provided the cargo details referred to below are forwarded to the Regional Harbour Master.
- electronic communication (other than voice) of the information which is required on this form.

Is this report for a local marine service?

No ☐ Complete Section A only

Yes ☐ Complete Section B overleaf only

Section A

Pilotage area or place for which the report is being made

Ship's name

Ship's IMO/Lloyd's number

Agent's name and address

Expected date and time of arrival / / : hrs

Expected date and time of departure / / : hrs

Expected date and time of removal / / : hrs

Expected date and time of transfer/loading of cargo / / : hrs

Is any part of the ship's cargo defined as 'dangerous goods' in the Definitions opposite?

No ☐

Yes ☐ Provide the following details: stowage, quantity, proper shipping name, UN number, IMDG classification and, where applicable, division, packaging group, flashpoint or flashpoint range (details may be provided on a separate sheet/s if necessary and attached to this form.)

Name of person in charge of handling, stowing, loading or unloading of the dangerous goods

Phone number Fax number

Is any part of the ship's cargo defined as 'dangerous cargo' (other than 'dangerous goods') in the Definitions opposite?

No ☐

Yes ☐ Provide the following details: stowage, quantity, proper shipping name, UN number, and, where applicable, flashpoint or flashpoint range (details may be provided on a separate sheet/s if necessary and attached to this form.)

Name of person in charge of loading, unloading or transfer of the dangerous cargo

Phone number Fax number

Is the dangerous cargo in good condition?

No ☐ Provide details: (details may be provided on a separate sheet/s if necessary and attached to this form.)

Yes ☐

I declare that the information provided, to the best of my knowledge, is true and correct.

Agent/Owner/Master's name

Agent/Owner/Master's signature Date / /

Section B

Location of local marine service

Ship's name

Ship's IMO/Lloyd's number

Operator's name and address

Contact person's name

Phone number Fax number

Is this report for an initial voyage of a new local marine service?

No ☐

Yes ☐ Expected date and time of commencement of voyage / / : hrs

Is this report for subsequent voyage/s as part of a local marine service?

No ☐

Yes ☐ Expected date and time of voyage/s (details may be provided on a separate sheet/s if necessary and attached to this form.)

 / / : hrs

 / / : hrs

Details of dangerous cargo to be carried: quantity, proper shipping name, IMDG classification, UN number and where applicable flashpoint or flashpoint range (details may be provided on a separate sheet/s if necessary and attached to this form.)

Are there any passengers intended to be carried during the transport of the dangerous cargo?

No ☐

Yes ☐ How many?

I declare that the information provided, to the best of my knowledge, is true and correct.

IMPORTANT NOTICE
Where the Services of a Pilot are Required

PROVISION OF A PILOT

1. Legislation requires that a person must not navigate a ship in a compulsory pilotage area unless the person uses the services of a pilot.
2. From 2 November 2013, changes to the *Transport Operations (Marine Safety) Act 1994* passed the responsibility for the provision and delivery of port pilotage services for ports north of Brisbane (except Abbot Point) to the port Government owned corporations. This is being achieved by giving port authorities the legal responsibility for the provision and delivery of pilotage services in designated Compulsory Pilotage Areas. The Responsible Pilotage Entities for all Compulsory Pilotage Areas are specified in Schedule 6 of the *Transport Operations (Marine Safety) Regulation 2004 (TOMS Regulation)*, as follows:

Column 1	Column 2
Compulsory pilotage area	**Responsible pilotage entity**
Southport pilotage area	Maritime Safety Queensland
Brisbane pilotage area	Maritime Safety Queensland
Bundaberg pilotage area	Gladstone Ports Corporation
Gladstone pilotage area	Gladstone Ports Corporation
Rockhampton pilotage area	Gladstone Ports Corporation
Hay Point pilotage area	North Queensland Bulk Ports Corporation
Mackay pilotage area	North Queensland Bulk Ports Corporation
Abbot Point pilotage area	Maritime Safety Queensland
Townsville pilotage area	Port of Townsville Limited
Lucinda pilotage area	Port of Townsville Limited
Mourilyan pilotage area	Far North Queensland Ports Corporation
Cairns pilotage area	Far North Queensland Ports Corporation
Cape Flattery pilotage area	Far North Queensland Ports Corporation
Skardon River pilotage area	Far North Queensland Ports Corporation
Thursday Island pilotage area	Far North Queensland Ports Corporation
Weipa pilotage area	Far North Queensland Ports Corporation
Karumba pilotage area	Far North Queensland Ports Corporation

**Note: The TOMS Regulation also rescinds the Bowen, Cooktown, Maryborough and Port Douglas as Compulsory Pilotage Areas however these areas remain as pilotage areas.*

3. Maritime Safety Queensland has entered into an agreement with Port of Townsville Limited to deliver pilotage services in the Abbot Point Compulsory Pilotage Area.
4. The Responsible Pilotage Entity may provide services on the basis that:
   - the person to whom the services are provided accepts the risk of loss or damage caused by an act or omission by the Responsible Pilotage Entity and waives any right to claim against the Responsible Pilotage Entity in contract, tort or otherwise howsoever, for any loss or damage (including consequential loss) to any person or property which arises directly or indirectly out of the provision of the pilotage services; and
   - The Responsible Pilotage Entity is not obliged to provide or arrange for the provision of the pilotage services if circumstances beyond their control mean the services cannot reasonably be provided at the time requested or at all and no compensation will be payable in this event.

     Circumstances beyond the control include, but are not limited to;-

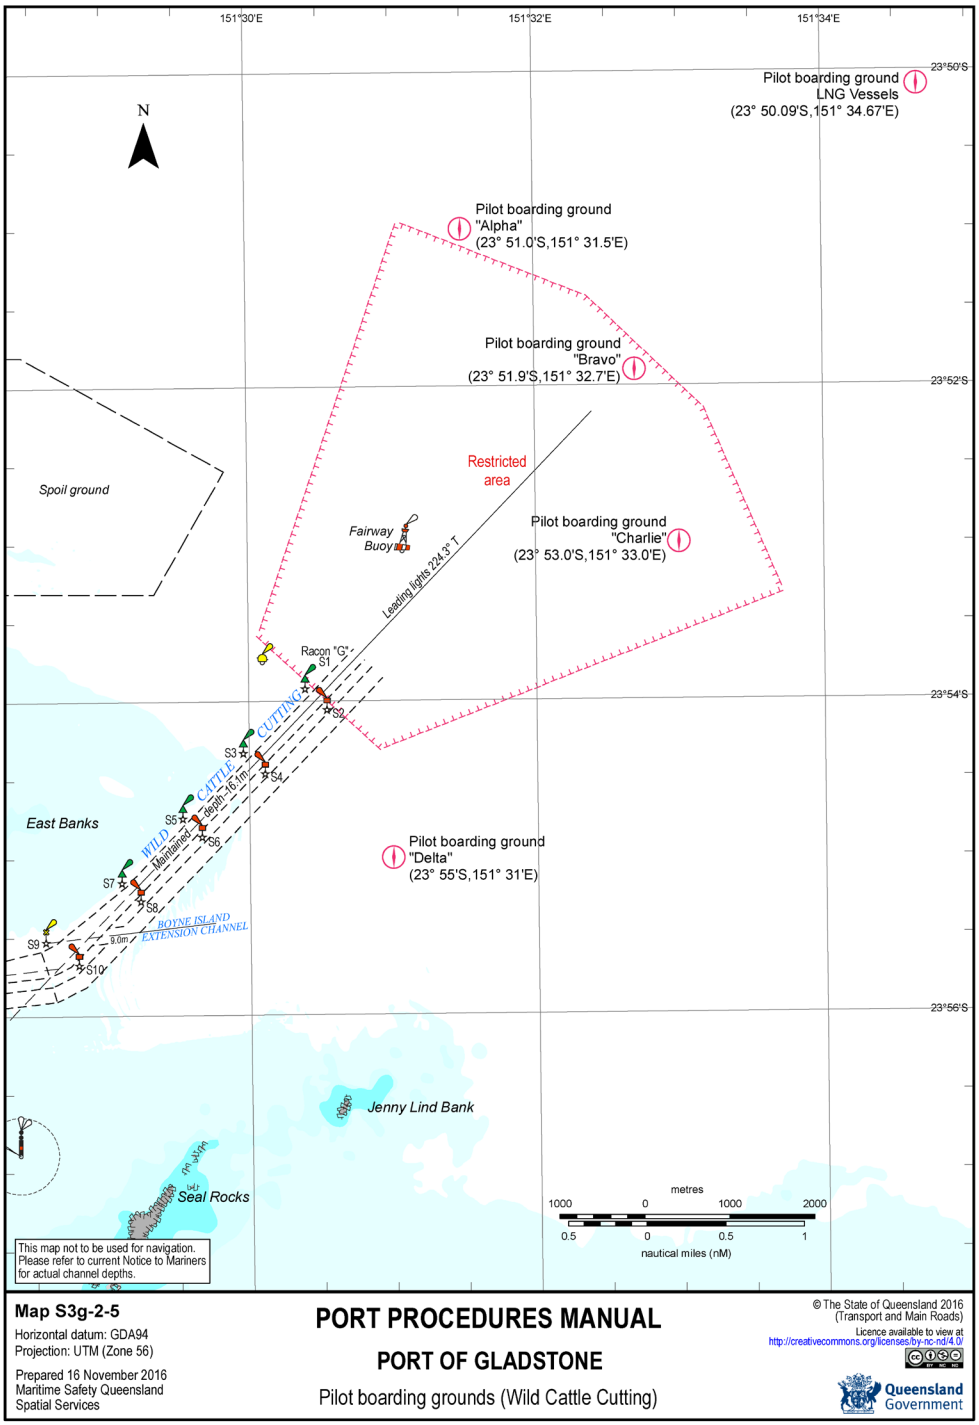
     - industrial action by pilots, line boat operators or others;
     - inability to schedule a pilot at the time required;
     - any direction or regulation having the effect of prohibiting or preventing the carrying out of the pilotage; or
     - a failure by a sub-contractor to carry out any part of the pilotage services.

The contents of this notice may be pleaded in any action or proceedings arising out of the provision of pilotage services.

SAMPLE

16.7 Pilot Boarding Grounds (Gladstone)

For a high resolution map please visit [Section 16.7 Pilot Boarding Grounds (Gladstone) - Gladstone: Port Procedures and Information for Shipping - Publications | Queensland Government]



16.8 Helicopter Operations Information (Gladstone)

You must advise your agent at least 12 hours prior to pilot boarding that you have read and understood these regulations; failure to do so will result in delays to your ship.

The embarkation and disembarkation of personnel by helicopter imposes certain mandatory conditions on the part of the ship and you, its master. These will involve the deck party being at a state of readiness for emergency action of a different nature but to a greater degree of preparation than that required for pilot launch transfer operations. If the helicopter attempts to make an emergency landing on board this may involve flying debris, spilt fuel with the associated danger of fire and more than likely, seriously injured personnel.

To assist in helicopter transfers, it is mandatory for the vessel to ensure that the Gladstone Pilot Helicopter (Landing) Operations form (16.9) is completed and returned to the Gladstone VTS Centre when the vessel booking application is made.

Under no circumstances will helicopter landings or uplifts be permitted from any vessel when bunker barge MV *Larcom* is moored alongside such vessel. This applies regardless of whether or not fuelling operations are in progress.

Further and more detailed information may be obtained from AMSA Marine Notices, AMSA Marine Order 57 and the International Chamber of Shipping (ICS), ‘Guide to Helicopter/Ship Operations’.

16.9 Gladstone Pilot Helicopter Operations Declaration

Queensland Government

Pilot Helicopter (Landing) Operations (Primary Helicopter - EC135)

Region:

Hay Point ☐ Gladstone ☐

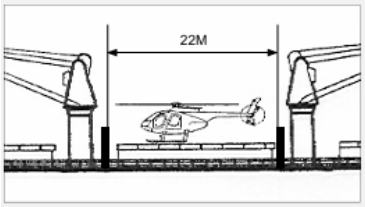
Name of ship | Agent

1. Do you understand that all helicopter communications will be on VHF Channel 10?
   Yes ☐ No ☐
2. Do you understand that any helicopter transfer during the hours of darkness will require your ship to switch on all deck and accommodation lighting?
   Yes ☐ No ☐
3. Is your ship geared?
   Yes ☐ ▶ Proceed to 4(a) No ☐ ▶ Proceed to 6
4a. Does your ship have a minimum clear area of 22m diameter for the helicopter landing, and a clear approach/ departure flight path of 22m or more across the ship? (see diagram 4(c) below)
   Yes ☐ No ☐

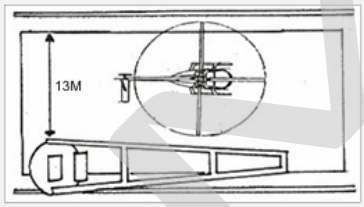
or

4b. If your ship has offset cranes - does it have 13m clear space between the crane and landing hatch side? (see diagram 4(d) below)
   Yes ☐ No ☐ Not applicable ☐

4(c) Centreline cranes



4(d) Shipside cranes



5. Is the landing hatch clear for helicopter operations without raising any cranes or derricks?
   Yes ☐ No ☐
6. Does your ship have timber stanchions?
   Yes ☐ ▶ Proceed to 7
   No ☐ ▶ Proceed to 8
7. Is there a minimum of 22m clearance between the stanchions that protrude higher than the hatch level?
   Yes ☐ ▶ Proceed to 8
   No ☐ ▶ Your vessel is not heli suitable
8. Will the landing hatch and adjacent hatches be closed and washed clean?
   Yes ☐ No ☐
9. Do you understand there is to be no loose equipment or ship's crew standing on or surrounding the landing hatch?
   Yes ☐ No ☐
10. Will a fire party with charged hoses, foam equipment, proximity suits and rescue equipment be on station clear and upwind of the landing hatch? (equipment as per SOLAS Ch 11.2 Reg 18)
    Yes ☐ No ☐

Page 1 of 2 LTSR Forms Area Form F5203 CFD V01 Jun 2025

Pilot Helicopter (Landing) Operations (Primary Helicopter - EC135) continued... page 2 of 2

11. Will a rescue boat be ready for immediate lowering?
    Yes ☐ No ☐
12. Will there be a safe means of access from the landing hatch to the deck?
    Yes ☐ No ☐
13. Do you and your crew understand that crew members are not to approach the helicopter, unless in an emergency?
    Yes ☐ No ☐
14. Can your ship's landing hatch accept a helicopter of 489kgs per square metre (dynamic load) and or maximum weight 2910kgs (static load)?
    Yes ☐ No ☐ ▶ The vessel is not helicopter suitable.
15. Do you have documents to confirm your ship's landing hatch can accept a helicopter of 489kgs per square metre (dynamic load) and or maximum weight 2910kgs (static load), as per Marine Order 57?
    Yes ☐ No ☐ ▶ The vessel is not helicopter suitable.
16. Is the landing hatch flat?
    Yes ☐ No ☐
17. Are the obstructions higher than 30cm on the landing hatch?
    Yes ☐ ▶ Please provide photos No ☐
18. Will your ship comply with the *International Chamber of Shipping Guide to Helicopter-Ship Operations*, as per Marine Order 57?
    Yes ☐ No ☐

Queensland Government

Marine Incident Report

Transport Operations (Marine Safety) Act 1994

This is the approved form to report a marine incident in Queensland. A ship's master must report a marine incident to a shipping inspector within 48 hours of the incident taking place, except in cases where the ship is lost or presumed lost in which case the incident must be reported by the ship's owner. If the initial report is not in the approved form a further report must be submitted using this form at the earliest opportunity. You should fill in all fields that are applicable. This form, and all supporting documents, should be returned to a Maritime Safety Queensland office, the Queensland Police Service or a Queensland Boating and Fisheries Patrol Office. Penalties apply for failing to report a marine incident.

Incident description

Position of incident

Date / / Time am pm Body of water/Landmark

Location

☐ Inland waters (non-tidal) ☐ Smooth waters ☐ Partially smooth waters ☐ Offshore Latitude Longitude

Type of incident

☐ Capsizing
☐ Swamping
☐ Flooding
☐ Person overboard
☐ Loss of stability
☐ Fire
☐ Explosion
☐ Structural/equipment failure
☐ Loss of ship [1]

Collision:
☐ between ships
☐ with a fixed object
☐ with a floating object
☐ with an animal
☐ with an overhead obstruction
☐ with a submerged object
☐ with a wharf

Grounding:
☐ unintentional
☐ intentional

Onboard incident:
☐ fall within ship
☐ crushing or pinching
☐ other onboard incident

Other incident:
☐ person hit by propeller or ship
☐ water skiing incident
☐ parasailing incident
☐ diving incident
☐ close call/near miss
☐ other incident caused by the operation of the ship

[1] 'Loss of ship' should only be selected where the ship has disappeared and the location and circumstances of the loss are unknown. If the ship is an economic write-off this should be check marked as 'Ship lost' below and on the next page.

Incident Severity Rating

☐ Fatality Number of persons
☐ Serious injury [2] Number of persons
☐ Ship lost [3] ☐ Ship damaged
☐ Damage to property only [4] ☐ No damage

[2] Requiring admission to hospital [3] Economic write-off or not recovered [4] No damage to any ships

Environmental conditions

Weather
☐ Clear ☐ Hazy ☐ Cloudy ☐ Rain ☐ Flood

Visibility
☐ Good ☐ Fair ☐ Poor

Water conditions
☐ Calm ☐ Choppy ☐ Rough ☐ Very rough ☐ Strong current or tidal flow Swell height (metres)

Wind speed
☐ None ☐ Light (1-6kts) ☐ Moderate (7-15kts) ☐ Strong (16-33kts) ☐ Gale (>33kts) Wind coming from

Fax completed declaration form to:

Gladstone Port Authority
Port Operations Officer……. Fax: +61 7 4972 3045 ……..Ph: +61 7 4976 1333

Tankers operating without inert gas:

- *Tankers operating without inert gas may only berth at a non-tanker berth provided all cargo tanks, slop tanks, cargo lines and associated pipe work are certified gas free by an independent chemist. That is, that the vessel is in a completely gas free condition.*

Tankers operating with inert gas:

- *The vessel's inert gas system MUST be fully operational so as to maintain a positive pressure in inerted tanks at all times. If work is to be carried out on the ship's inert gas installation or boiler or other sections of plant or piping which affect inert gas supply, an independent supply of inert gas is to be put into place and fully operational prior to repair work commencing.*
- *Any tank, including slop tanks, containing high flash point cargo or residues, MUST have the ullage space maintained in an inert condition unless otherwise authorised by the Gladstone Ports Corporation.*
- *All empty tanks that last carried a low flash cargo MUST be washed and/or gas freed and not have a vapour test reading in excess of the equivalent to 1% hydrocarbon as referenced to Hexane.*
- *Any empty tank that last carried a low flash cargo and has not been gas freed MUST not have a hydrocarbon content exceeding 2% by volume.*
- *Special conditions apply to slop tank(s) that contain low flash point slops/products.*

a) Wherever possible slops should be confined to a single designated slops tank.

b) If the flash point is <60°C then the tank MUST be tested and certified that the content of low flash product within the slops does not exceed 5% of the tank's volume.

c) The ullage space of the slop tank MUST be inserted.

- Positive inert gas pressure on tanks is to be maintained at all times and the oxygen content of the inert gas MUST not exceed 5%.
- If a vessel's inert gas system were not operational, then she would be classed as a "tanker operating without inert gas" and is to follow the requirements as per a vessel of this type.

DECLARATION

I _____ of

_____ an independent chemist hereby declare that I have examined the vessel_____ and it has met all of the conditions as stated above at _____hrs on / / .

Proposed Berth: _____ Proposed berthing details:

Arrival time/date at berth: _____ Departure time/date at berth:_____

Signed _____ (an independent chemist) Return Fax

Number:_____

If the ship's tank contents status changes for any reason, a new "Chemist's Certificate of Compliance" MUST be issued and approved. Permission is granted for the vessel to berth in accordance with the details outlined in this declaration:

Instructions to Masters of ships berthed within 800 metres of a nuclear powered warship berthed in the port of Gladstone.

A Nuclear Powered Warship, the _____ is berthed within 800 m of your vessel.

The vessel is due to depart on: _____

In case of a reactor accident in the vessel the Regional Harbour Master via GLADSTONE VTS on VHF channels 13 or 16 will advise. On receipt of such advice, you are requested to take the following action:

As far as possible, shut down ventilation or turn to recirculation and close hatches, scuttles, port holes, doors and openings, etc, to minimise the ingress of airborne radioactive material;

If non-essential personnel have access to transport they should self-evacuate to the assembly area, which is situated on _____. Emergency services personnel will direct your personnel to the assembly area.

All personnel remaining on board should seek shelter below decks until otherwise instructed. Ideal shielding is likely to be provided by your accommodation and/or engine room;

You should contact Gladstone VTS on VHF channel 13 or 16 if you have any queries.

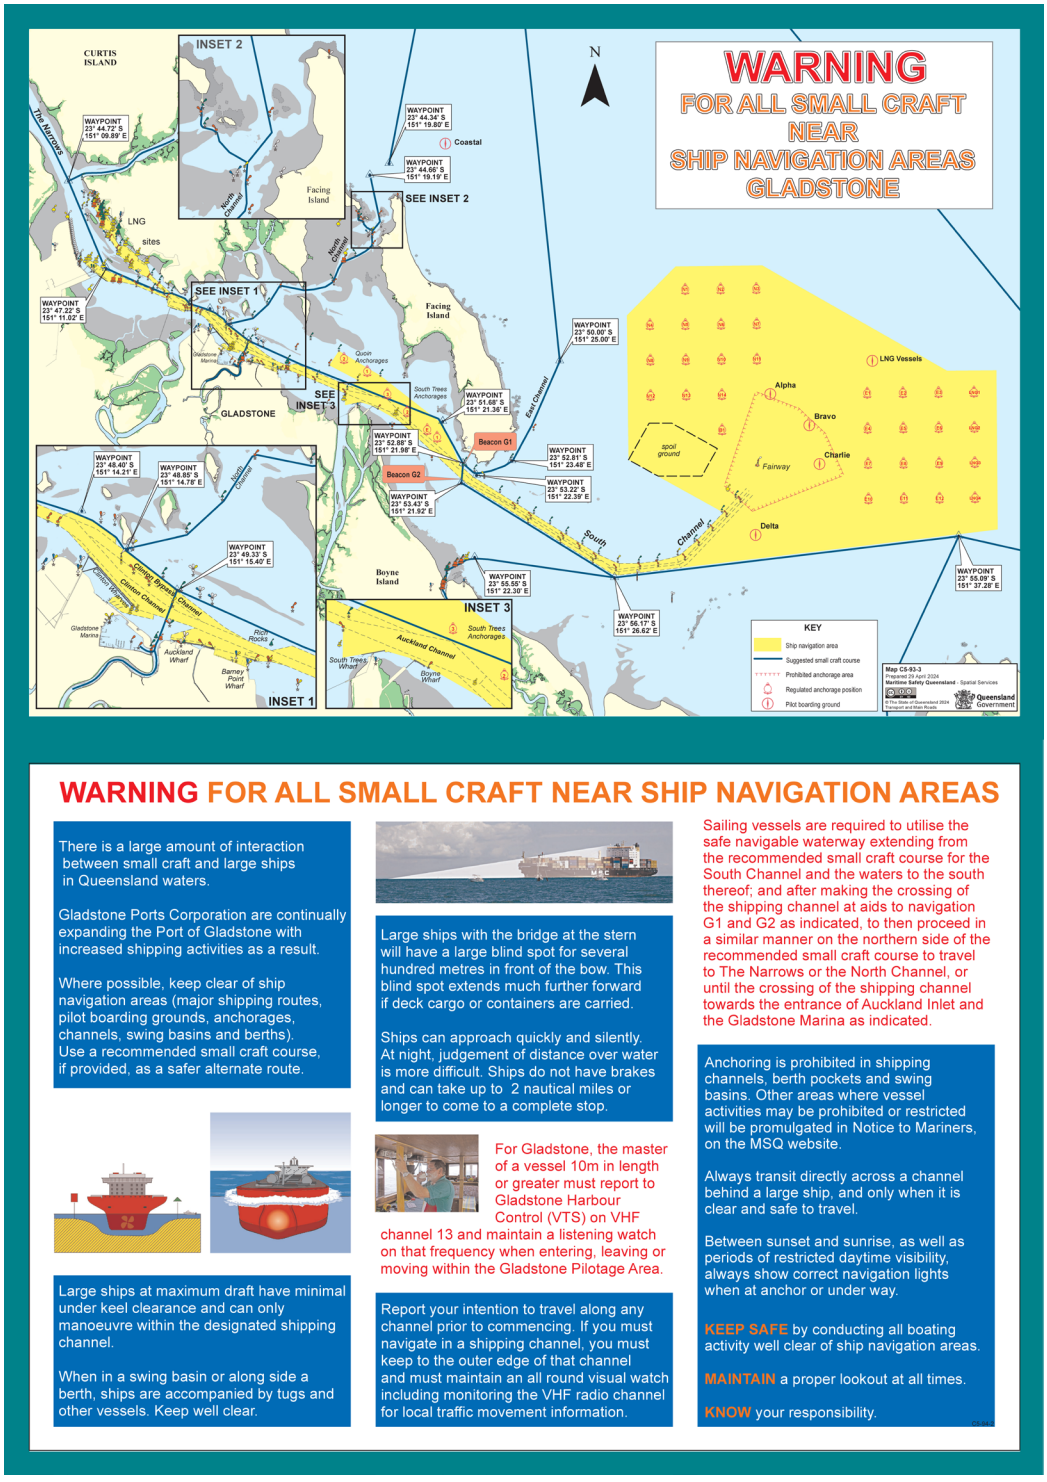
16.32 Small Craft Ship Navigation Areas and Recommended Courses

For a high resolution map please visit [Section 16.32 Small Craft Ship Navigation Areas and Recommended Courses - Gladstone: Port Procedures and Information for Shipping - Publications | Queensland Government]



WARNING FOR ALL SMALL CRAFT NEAR SHIP NAVIGATION AREAS

There is a large amount of interaction between small craft and large ships in Queensland waters.

Gladstone Ports Corporation are continually expanding the Port of Gladstone with increased shipping activities as a result.

Where possible, keep clear of ship navigation areas (major shipping routes, pilot boarding grounds, anchorages, channels, swing basins and berths). Use a recommended small craft course, if provided, as a safer alternate route.

Large ships at maximum draft have minimal under keel clearance and can only manoeuvre within the designated shipping channel.

When in a swing basin or along side a berth, ships are accompanied by tugs and other vessels. Keep well clear.

Large ships with the bridge at the stern will have a large blind spot for several hundred metres in front of the bow. This blind spot extends much further forward if deck cargo or containers are carried.

Ships can approach quickly and silently. At night, judgement of distance over water is more difficult. Ships do not have brakes and can take up to 2 nautical miles or longer to come to a complete stop.

For Gladstone, the master of a vessel 10m in length or greater must report to Gladstone Harbour Control (VTS) on VHF channel 13 and maintain a listening watch on that frequency when entering, leaving or moving within the Gladstone Pilotage Area.

Report your intention to travel along any channel prior to commencing. If you must navigate in a shipping channel, you must keep to the outer edge of that channel and must maintain an all round visual watch including monitoring the VHF radio channel for local traffic movement information.

Sailing vessels are required to utilise the safe navigable waterway extending from the recommended small craft course for the South Channel and the waters to the south thereof; and after making the crossing of the shipping channel at aids to navigation G1 and G2 as indicated, to then proceed in a similar manner on the northern side of the recommended small craft course to travel to The Narrows or the North Channel, or until the crossing of the shipping channel towards the entrance of Auckland Inlet and the Gladstone Marina as indicated.

Anchoring is prohibited in shipping channels, berth pockets and swing basins. Other areas where vessel activities may be prohibited or restricted will be promulgated in Notice to Mariners, on the MSQ website.

Always transit directly across a channel behind a large ship, and only when it is clear and safe to travel.

Between sunset and sunrise, as well as periods of restricted daytime visibility, always show correct navigation lights when at anchor or under way.

KEEP SAFE by conducting all boating activity well clear of ship navigation areas.

MAINTAIN a proper lookout at all times.

KNOW your responsibility.

Capacity of bunker tanks MDO m³

Capacity of bunker tanks MGO m³

R. Insurance/Indemnity requirements

Protection and Indemnity (P&I) Club full style

P&I Club insurance - Certificate of Currency covering liability for pollution, other incidents such as collision and removal of wreckage and liability for property damage (for not less than $1 billion in respect to oil pollution liability and not less than $150 million for all other liability). Copy of Certificate to be attached

Hull and Machinery insurance - Certificate of currency covering hull and machinery, collision liability, removal of wreckage and institute war and strikes insurance (for not less than the replacement value of hull and machinery, the removal of wreckage and collision liability). Copy of Certificate to be attached

Other insurance - Certificate of Currency as reasonably required by Gladstone Ports Corporation or as otherwise required by law to be effected. Copy of Certificate to be attached

Indemnity Agreement (Tugs Bollard Pull) - A separate indemnity in favour of Maritime Safety Queensland (MSQ) and Gladstone Ports Corporation (GPC) in the prescribed form.

S. Port State Control

Date and place of last Port State Control inspection

Date / / Place

Any outstanding deficiencies as reported by any Port State Control. Please provide details.

T. Recent operational history

Has vessel been involved in a pollution, grounding, serious casualty or collision incident during the past 12 months? Please provide details.

Last three cargoes/charterers/voyages (Last/second last/third last)

Notes:

1. For initial calls at Gladstone all sections to be completed.
2. For subsequent calls sections B, G, S and T only need to be completed.
3. If any changes are made to this form subsequent to being submitted, then GPC and MSQ must be notified.

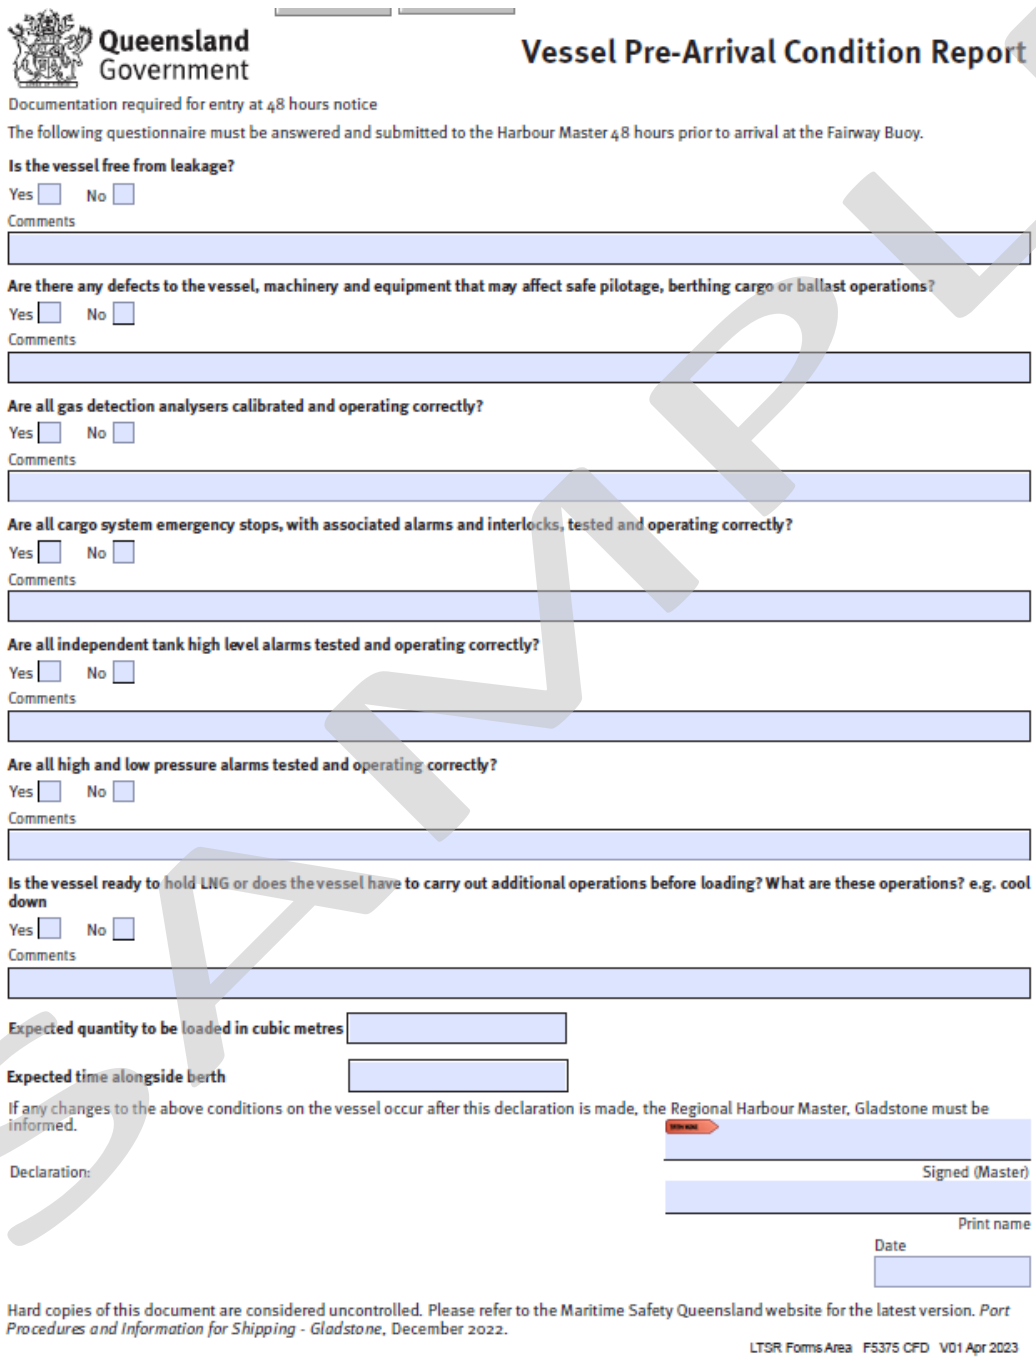
This is a replica of the form and is not intended to be used



Queensland Government

Vessel Pre-Arrival Condition Report

Documentation required for entry at 48 hours notice

The following questionnaire must be answered and submitted to the Harbour Master 48 hours prior to arrival at the Fairway Buoy.

Is the vessel free from leakage?

Yes ☐ No ☐

Comments

Are there any defects to the vessel, machinery and equipment that may affect safe pilotage, berthing cargo or ballast operations?

Yes ☐ No ☐

Comments

Are all gas detection analysers calibrated and operating correctly?

Yes ☐ No ☐

Comments

Are all cargo system emergency stops, with associated alarms and interlocks, tested and operating correctly?

Yes ☐ No ☐

Comments

Are all independent tank high level alarms tested and operating correctly?

Yes ☐ No ☐

Comments

Are all high and low pressure alarms tested and operating correctly?

Yes ☐ No ☐

Comments

Is the vessel ready to hold LNG or does the vessel have to carry out additional operations before loading? What are these operations? e.g. cool down

Yes ☐ No ☐

Comments

Expected quantity to be loaded in cubic metres

Expected time alongside berth

If any changes to the above conditions on the vessel occur after this declaration is made, the Regional Harbour Master, Gladstone must be informed.

Name and address:

Date:

Dear Captain/Madam/Sir,

Deed of Indemnity - Port of Gladstone Escort Tugs

Vessel
All Liquefied Natural Gas (LNG) vessels loading cargo in the Port of Gladstone will be required to connect two escort tugs which will be tethered in tandem when entering and departing the harbour. The process of Tethered Escort Towage (TET) has been extensively simulated to prove the feasibility of the operation in the Port of Gladstone. Tugs specifically designed for the task will be utilised for escort towage.

Background
This letter relates to *Chapter 9 Tug Requirements for LNG*, and *Appendix 16.39 Deed of Indemnity – Port of Gladstone Escort Tugs* (attached) of the Port Procedures and *Information for Shipping – Gladstone (PPM Gladstone)* as updated from time to time. The PPM Gladstone requires the use of escort tugs for LNG vessels entering the port.

For TET, all LNG vessels are required to be equipped with bitts, bollards, chocks and fairleads with a minimum Safe Working Load (SWL) of 150 tonnes.

Further matters
LNG vessels will transit all channels and cuttings with two approved escort tugs at speeds up to about 10 knots with tugs made fast. Although the decision as to where to make the tugs fast will be made after consultation between the pilots and the LNG vessel master, it is expected that both escort tugs should be attached on the stern (tandem deployment) for inbound and outbound transits of the port.

Four escort tugs should be ready to make fast between A1 and A5 subject to the discretion of the harbour pilot in charge in conjunction with the vessel's master. All tugs will be progressively released on departure between A5 and A1 also subject to the discretion of the harbour pilot in charge in conjunction with the vessel's master.

Requirements
The tug securing equipment on your vessel may require tethered escort tugs to exceed the equipment's maximum SWL.

It is a condition of approval of escort towage for your vessel, as described above, that you provide an indemnity in relation to any damage caused by the escort tugs to your vessel.

Please sign and return the following **enclosed** documents:

1. Duplicate of this letter
2. Deed of Indemnity.

Should you have any questions regarding this, please contact me at the Maritime Safety Queensland Gladstone office on 4971 5200.

Yours faithfully

John Fallon

16.38 Vessel Interaction Prevention CCF Berths

10 December 2021

Queensland Government
Department of Transport and Main Roads

Dear Captain
VESSEL INTERACTION PREVENTION CCF Berths

You are currently berthed at the Clinton Coal Facility (CCF), this places your vessel close to the channel used by outbound deep draft vessels departing the WICET coal terminal, or from deep draft vessels departing CCF1 (if you are berthed at CCF2, CCF3 or CCF4).

Whilst every effort will be made to reduce the effects of interaction of passing vessels on your vessel, it is important that you:

1. Follow the direction of Wharf Supervisors at CCF with respect to mooring lines,
2. Ensure your vessel is hard against fenders when a deep draft vessel from WICET or CCF1 is passing, and
3. Maintain a continuous watch on VHF channel 13.

Yours faithfully,

John Fallon

16.39 Barney Point Wharf Passing Vessel Interaction Prevention

24 June 2014

Queensland Government
Department of Transport and Main Roads

To Whom It May Concern

BARNEY POINT WHARF PASSING VESSEL INTERACTION PREVENTION

1. In April 2012 Gladstone Ports Corporation met with key stakeholders regarding Vessel Interaction at Barney Point and how best to mitigate the risk of vessels pulling away from the Berth, during passing by a deep draft vessel. The result of this meeting was a Memorandum, issued by GPC detailing additional requirements for vessels berthed alongside Barney Point when all of the following conditions are met:
   a. Vessel passing Barney Point Wharf is >14.0m draft
   b. Vessel at Barney Point Wharf is >13.5m deepest draft
   c. Length Overall of vessel at Barney Point Wharf is >225m
   d. Beam of vessel at Barney Point Wharf is ≥32m

2. The requirements to be implemented when all the above conditions are met are:
   a. A pilot is to be on board 30 minutes prior to the vessel passing,
   b. A tug is to be ready to engage 30 minutes prior to the vessel passing and remain ready until the vessel has passed and is clear,
   c. The vessel crew should tension lines and put them on the brake 30 minutes prior to the vessel passing and be clear of the deck 10 minutes prior, and
   d. The gangway is to be raised until the vessel has passed and is clear.

3. In view of the continued risk of vessel interaction at Barney Point and to maintain safety, I am writing to advise that the decisions from the April 2012 meeting remain extant and that charges incurred will be sent to the Shipping Agency of the ship alongside Barney Point.

4. In addition since the introduction of the requirements of the Memorandum in 2012, additional requirements have been implemented to further mitigate risks. These include the requirement for vessels to have the starboard side anchor lowered underfoot at all times while made fast and for vessels to maintain 1.0m Under Keel Clearance at all times while alongside. These requirements will also continue to be enforced.

5. For your information, vessels berthing at Barney Point and the Clinton Coal Terminal are presented with a direction from myself by the Pilot on-board when they arrive. This direction lists the requirements for vessels alongside both facilities. A copy of this form is also enclosed.

6. Please don't hesitate to contact me any further information.

Yours faithfully,

John Fallon

16.41 Pilot Ladder Checklist

Please follow this link to access the official fillable PDF form: Pilot Ladder Checklist - Gladstone

This is a replica of the form and is not intended to be used

Queensland Government

Pilot Ladder Checklist For Gladstone

Vessel name:

Date of pilot transfer

To the Master of the Vessel,

You and your crew are required to fully cooperate with the pilot launch crew to ensure the safe transfer of pilots to and from your vessel. You are responsible to ensure that the pilot ladder has been stored and maintained in good condition and that it is regularly inspected and certified by the manufacturer of the ladder that it complies with the requirements of SOLAS CH V- Regulation 23 - Pilot Transfer Arrangements Resolution A.1045 (27).

Maritime Safety Queensland supports all members of the pilot launch crew who decide not to transfer due to an unsafe ladder arrangement. Please note that any failure from you to provide a fully compliant pilot transfer arrangement will result in your vessel being rejected for pilot boarding, and additional charges may be levied to your vessel.

The Master of the Vessel is to ensure this Pilot Ladder Checklist has been completed and sent to the vessel's agent at least 72 hours prior to the planned pilot transfer taking place. The vessel's agent will enter the completed form into QSHIPS.

Item	Checks to be performed	Yes	No
1.	Have all pilot ladders been kept clean, properly maintained, stowed and inspected at least 72 hours prior to arrival at the port to ensure that they are safe to use?	☐	☐
2.	Are 'Certificates of Conformity' and 'Inspection Certificates' for pilot ladders maintained on-board the vessel?	☐	☐
3.	Are manufacturer's plates clearly visible with matching certification for each ladder?	☐	☐
4.	Are all pilot ladders only used for the embarkation and disembarkation of personnel?	☐	☐
5.	Is there a copy of International Maritime Pilots Association 'required boarding arrangements for pilots' poster displayed on board?	☐	☐
6.	Will the supervision of the rigging of the pilot ladder and of the pilot transfer arrangements be conducted by a responsible officer who has means of communication with the navigation bridge?	☐	☐
7.	Will the vessel provide a person to escort the pilot by a safe route to and from the navigation bridge?	☐	☐
8.	Will the pilot ladder and any operating mechanical equipment be tested prior to use?	☐	☐
9.	Are there at least two people (including one Officer) on the ship, near the pilot boarding area to assist pilot's embarkation/disembarkation?	☐	☐
10.	Are the ropes, heaving lines, splices and thimbles in good condition?	☐	☐
11.	Are the steps, spreaders and chocks in good condition and free of any coatings?	☐	☐
12.	Is the pilot ladder properly secured to the deck of ship?	☐	☐
13.	Is the deck area where the pilot disembarks clean and free of obstructions?	☐	☐
14.	Are the heaving line(s) in good condition and suitable for their intended use? Heaving line to be between 12-16mm diameter and fully inspected prior to use.	☐	☐
15.	Are man ropes of at least 28mm and no more than 32mm in diameter and securely rigged?	☐	☐
16.	Are the man ropes less than 24months old from the date of manufacture?	☐	☐
17.	Have the manropes been in service for less than 12 months?	☐	☐
18.	Is each pilot ladder less than 30 months old, or have they undergone the strength test as outlined in ISO 799-2019 with relevant certification?	☐	☐
19.	Is the pilot ladder tied to a strongpoint on the ship, resting on the parallel body of the ship and are the steps horizontal?	☐	☐

Pilot Ladder Checklist continued page 2 of 2

20.	Is there an additional back-up pilot ladder available on board the vessel? (this is not a current requirement but is considered best practice)	☐	☐
21.	Is the vessel capable and well-rehearsed in retrieving a man overboard?	☐	☐
22.	Is there a lifebuoy and self-igniting light available at the pilot boarding area?	☐	☐
23.	Is the boarding area adequately lit for pilot transfers at night?	☐	☐
