

# ACID SULFATE HAZARD THE NARROWS AREA

Scale 1:50 000

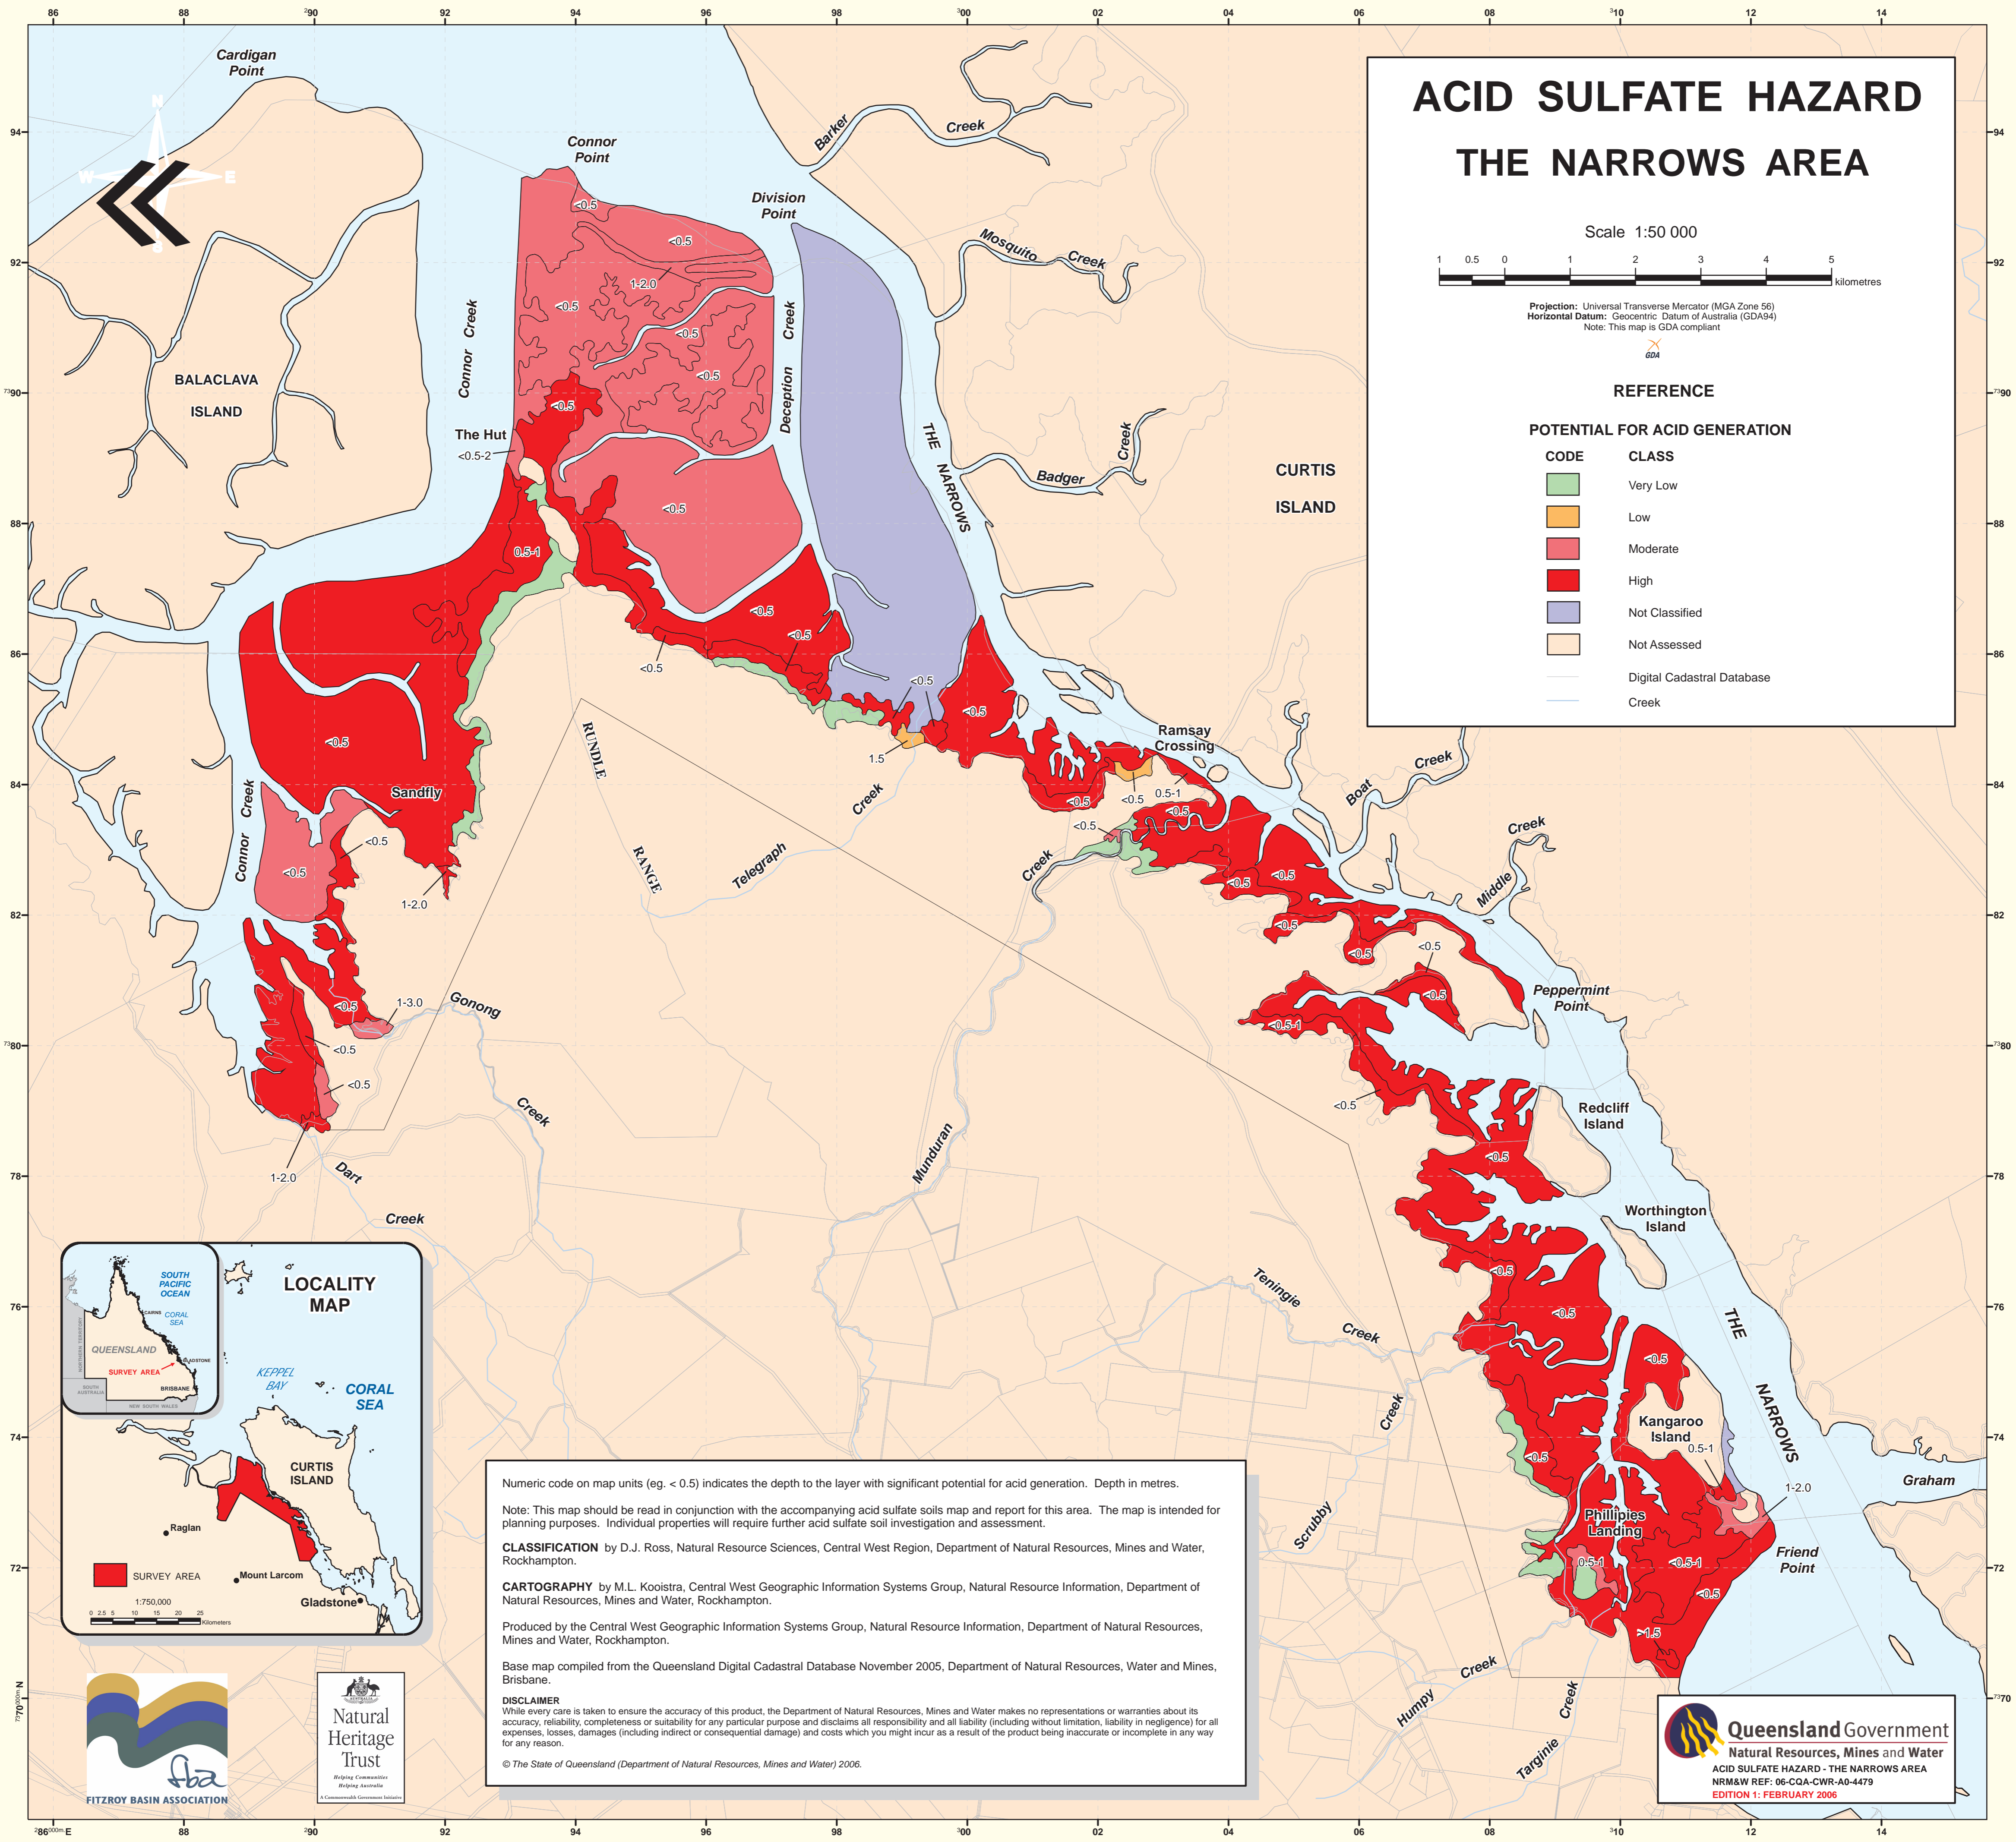

Projection: Universal Transverse Mercator (MGA Zone 56)  
Horizontal Datum: Geocentric Datum of Australia (GDA94)  
Note: This map is GDA compliant

## REFERENCE

### POTENTIAL FOR ACID GENERATION

CODE	CLASS
	Very Low
	Low
	Moderate
	High
	Not Classified
	Not Assessed
	Digital Cadastral Database
	Creek

Numeric code on map units (eg. <0.5) indicates the depth to the layer with significant potential for acid generation. Depth in metres.

Note: This map should be read in conjunction with the accompanying acid sulfate soils map and report for this area. The map is intended for planning purposes. Individual properties will require further acid sulfate soil investigation and assessment.

**CLASSIFICATION** by D.J. Ross, Natural Resource Sciences, Central West Region, Department of Natural Resources, Mines and Water, Rockhampton.

**CARTOGRAPHY** by M.L. Kooistra, Central West Geographic Information Systems Group, Natural Resource Information, Department of Natural Resources, Mines and Water, Rockhampton.

Produced by the Central West Geographic Information Systems Group, Natural Resource Information, Department of Natural Resources, Mines and Water, Rockhampton.

Base map compiled from the Queensland Digital Cadastral Database November 2005, Department of Natural Resources, Water and Mines, Brisbane.
