Visitors to agriculture properties and farms

As a visitor you may inadvertently bring pests and diseases to agricultural properties on your vehicle, equipment, clothing or footwear.

Visitors can include suppliers, veterinarians, transporters, stock agents, workers, researchers, utility workers, and guests.

Biosecurity is everyone's responsibility. Follow these steps to prevent or minimise biosecurity risks when visiting properties.

- Follow any biosecurity zones and other movement restrictions.

- Come clean, go clean by ensuring your shoes, clothing, vehicles and equipment are free from weed seeds, dirt, soil or debris before entering and leaving agricultural properties.

  Come clean, go clean video QR code:

- Park in the property's designated area for visitors.

- Ensure you have signed in as a visitor using Farm check-in or other methods when visiting a property. Property owners should have signage at their front gate advising how you can sign in or register as a visitor.

  Farm check-in QR code:

- Report to the homestead or farm office when you first arrive. Do not enter livestock areas or cropping or plantation areas without permission and follow the property owner's conditions of entry.

- Comply with the property owner's biosecurity management plan or biosecurity plan.

- Follow the property owner's directions regarding driving on designated tracks, abiding by signage, avoiding movement through certain areas and leaving gates as you find them.

- Consider carrying a biosecurity toolkit in your vehicle if you visit agricultural properties regularly.

  Biosecurity toolkit QR code:

Report any biosecurity concerns

Report any biosecurity concerns to the farm manager or property owner immediately or call Biosecurity Queensland on 13 25 23.

For suspected cases of emergency animal or plant pests or diseases, call the:

- Emergency Animal Disease Watch Hotline on 1800 675 888

- Exotic Plant Pest Hotline on 1800 084 881

Stay informed
