- Class C - Pasture Land
- Stream Channels
- Study boundary
- Shire boundary
- Creek Reserves
- Cadastral boundaries

**DISCLAIMER:**  
While every care is taken to ensure the accuracy of this product, the Department of Natural Resources and Mines makes no representations or warranties about its accuracy, reliability, completeness or suitability for any particular purpose and disclaims all responsibility and all liability (including without limitation, liability in negligence) for all expenses, losses, damages (including indirect or consequential damage) and costs which you might incur as a result of the product being inaccurate or incomplete in any way for any reason.

**INTENSITY STATEMENT:**  
This assessment uses the results of a medium intensity soils survey. The soil survey was based on aerial photograph interpretation and ground observations of the order of one observation to an area of 33 hectares.

**NOTES:**  
Agricultural land classes generally refer to the land suitability classes for specific land uses. This relationship is shown in "Guidelines for Agricultural Land Evaluation in Queensland" (QDPI Land Resources Branch 1994).

It is assumed that potential irrigation is available for alluvial soils.
